DIRECTORS' REPORT

The Directors are pleased to present their report together with the audited financial statements of the Company for the financial year ended December 31, 2021.

PRINCIPAL ACTIVITIES

The Company is engaged in the provision of finance to the housing sector and there has been no change in this activity for the financial year under review.

RESULTS

	SR
Profit before taxation	24,592,561
Tax expense	<u>(9,959,921)</u>
Profit for the year	14,632,640
Retained earnings brought forward	<u>96,937,598</u>
Retained earnings carried forward	<u><u>111,570,238</u></u>

DIVIDENDS

The Directors did not recommend any dividends for the financial year under review (2020: Nil).

PROPERTY AND EQUIPMENT

The property and equipment of the Company and the movements therein are detailed in Note 9 to the financial statements.

The Directors are of the opinion that the carrying amount of property and equipment does not materially differ from its fair value as at December 31, 2021.

DIRECTORS AND DIRECTORS' INTEREST

The Directors of the Company from the date of the last report and to-date are:

Jennifer Morel (Chairperson)
 Ronny Palmyre (Chief Executive Officer)
 Daniel Frichot
 Elizabeth Agathine
 Michel Marie
 Yves Choppy (Resigned effective October 26, 2021)

None of the Directors held an interest in the shares of the Company during the year under review.

STATEMENT OF DIRECTORS' RESPONSIBILITIES

The Directors are responsible for the overall management of the affairs of the Company including the operations of the Company and making investment decisions.

DIRECTORS' REPORT (CONT'D)

STATEMENT OF DIRECTORS' RESPONSIBILITIES (CONT'D)

The Directors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards (IFRS) and in compliance with the Seychelles Companies Act, 1972. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances. The Directors have the general responsibility of safeguarding the assets, both owned by the Company and those that are held in trust and used by the Company.

The Directors consider they have met their aforesaid responsibilities.

AUDITORS

The auditors, Messrs. BDO Associates, retire and being eligible offer themselves for re-appointment.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS

Report on the audit of the Financial Statements

Opinion

We have audited the financial statements of **HOUSING FINANCE COMPANY LIMITED** set out on pages 4 to 52 which comprise the Statement of Financial Position as at December 31, 2021, the Statement of Profit or Loss and Other Comprehensive Income, Statement of Changes in Equity and the Statement of Cash Flows for the year then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements give a true and fair view of the financial position of the Company as at December 31, 2021 and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and comply with the Seychelles Companies Act, 1972.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants (IESBA Code)* together with the ethical requirements that are relevant to our audit of the financial statements in Seychelles, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

Compliance with Financial Institutions Act 2004, as amended and Regulations and Directives of the Central Bank of Seychelles

- (a) All categories of non-performing loans shall be placed on a non-accrual basis, that is interest due but uncollected should not be accrued as income but instead should be shown as 'Interest in Suspense'. The Company's software is presently unable to identify and suspend interest so as to recognise it in Interest Suspense and consequently all interest has been recognised in the Statement of Profit or Loss.
- (b) The Company accepts interest bearing deposits from its customers but does not possess a license for this activity. The Company has represented to us that this matter is under discussion with the Ministry of Finance to facilitate this.

Our opinion is not qualified in respect of the above matters.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS**Key Audit Matter**

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Allowance for Expected Credit Losses (ECL)*Key Audit Matter*

Determining expected credit losses ('ECL') involves Management's judgement and is subject to significant uncertainties, which have varied considerably as a result of the Covid-19 pandemic.

Inherently judgemental modelling was used to estimate ECL which involves determining Probabilities of Default ("PD"), Loss Given Default ("LGD"), Exposures at Default ("EAD") and defining the criteria for increases in significant credit risk. The impact of COVID-19 on the economy has increased significantly the level of uncertainties. It remains unclear when the Global economy will fully recover from the COVID-19 pandemic. Reports of new waves and variants of the virus in many parts of the World are being followed up with further lockdown measures, which are adversely impacting economic activities and in many cases livelihood.

The Company faced significant challenges to adapt its IFRS 9 modelling as compared to previous period so as to adequately fit the new Normal. In addition to the ECL framework, the Company placed significant reliance on Management's overlay given the environment of increased uncertainty and vulnerability as well as limited view of credit risks in its portfolio.

These factors have increased the uncertainty around judgements made in determining the severity and likelihood of macroeconomic variable ('MEV') forecasts across different economic scenarios used in ECL models. Furthermore, these conditions are outside the bounds of historical experience used to develop the models, where these models produce plausible results, resulting in significantly greater limitations in their reliability to estimate ECLs.

At December 31, 2021, the Company reported total credit impairment of SR 39.3m out of which SR 38.6m was in respect of drawn loans and advances.

How our audit addressed the key audit matter

- Evaluated the appropriateness of the Company's IFRS 9 impairment methodologies;
- Reperformed and inspected model code for the calculation of certain components of the ECL model (including the staging criteria);
- Evaluated whether the changes were appropriate by assessing the updated IFRS 9 model methodology;
- Checked the reasonableness of the Company's considerations on the ECL impact of the current economic environment due to COVID-19;

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS (CONT'D)**Key Audit Matters (Cont'd)***How our audit addressed the key audit matter (Cont'd)*

- Sample-tested key inputs, data and assumptions impacting ECL calculations to assess the reasonableness of economic forecasts, weights, and model assumptions applied;
- We assessed whether the disclosures were appropriate addressed the uncertainties which existed when determining the ECL including sensitivity analysis done. In addition, we assessed whether the disclosure of the key judgements and assumptions made was sufficiently clear.

Responsibilities of Directors and Those Charged with Governance for the Financial Statements

The Directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and in compliance with the Companies Act, 1972, the Financial Institutions Act 2004, as amended and the Regulations and Directives of the Central Bank of Seychelles, and for such internal control as the directors determine is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so. Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS (CONT'D)**Auditor's Responsibilities for the Audit of the Financial Statements (Cont'd)**

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Directors.
- Conclude on the appropriateness of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements***Companies Act, 1972***

We have no relationship with, or interests in, the Company, other than in our capacity as auditors and dealings in the ordinary course of business.

We have obtained all information and explanations we have required.

In our opinion, proper accounting records have been kept by the Company as far as it appears from our examination of those records.

Public Enterprise Monitoring Commission (PEMC) Act, 2013

In our opinion, proper accounting records have been kept by the Company as far as it appears from our examination of those records.

We have obtained all the information necessary for the purpose of our audit and are satisfied with the information received.

HOUSING FINANCE COMPANY LIMITED

3(d)

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS (CONT'D)

Report on Other Legal and Regulatory Requirements (Cont'd)

Financial Institutions Act 2004, as amended and Regulations and Directives of the Central Bank of Seychelles (Cont'd)

The Financial Institutions Act 2004, as amended and Regulations and Directives of the Central Bank of Seychelles requires that in carrying out our audit, we consider and report to you the following matters. We confirm that:

- In our opinion, the financial statements have been prepared on a basis consistent with that of the preceding year and are complete, fair and properly drawn up and comply with the Financial Institutions Act 2004, as amended and Regulations and Directives of the Central Bank of Seychelles except as discussed under the Emphasis of Matter paragraphs.
- The explanations or information called for or given to us by Management and employees of the Company were satisfactory.
- The Company did not carry out any fiduciary duties during the year under review.

Other Matters

This report is made solely to the members of **HOUSING FINANCE COMPANY LIMITED**, as a body, in terms of our engagement to conduct the audit on their behalf. Our audit work has been undertaken so that we might state to the Company's members those matters which we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company or the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

The notes on pages 8 to 52 form an integral part of these financial statements.
Auditor's report on pages 3 to 3(d).

1. GENERAL INFORMATION

Housing Finance Company Limited is a limited liability company, incorporated and domiciled in Seychelles and is involved in providing finance to the housing sector.

The principal place of business is situated at the Victoria House, Mahé, Seychelles.

The financial statements will be submitted for consideration and approval at the forthcoming Annual General Meeting of Shareholders of the Company.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied for all years presented, unless otherwise stated. Where necessary, comparative figures have been amended to conform with the change in presentation in the current year.

(a) Basis of preparation

The financial statements of **Housing Finance Company Limited** have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations issued by the IFRS Interpretations Committee (IFRS IC) applicable to companies reporting under IFRS and are in compliance with the Seychelles Companies Act, 1972, the Financial Institutions Act, 2004 as amended and Regulations and Directives of the Central Bank of Seychelles as well as the PEMC Act 2013 and presented in Seychelles Rupee (SR).

These financial statements have been prepared under the historical cost convention as modified by the application of fair value measurements required or allowed by relevant accounting standards.

(b) New and amended standards and interpretations effective in the reporting period

(i) *Interest Rate Benchmark Reform - Phase 2: Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 & IFRS 16*

The amendments provide temporary reliefs which address the financial reporting effects when an interbank offered rate (IBOR) is replaced with an alternative nearly risk-free interest rate (RFR). The amendments include the following practical expedients:

- A practical expedient to require contractual changes, or changes to cash flows that are directly required by the reform, to be treated as changes to a floating interest rate, equivalent to a movement in a market rate of interest
- Permit changes required by IBOR reform to be made to hedge designations and hedge documentation without the hedging relationship being discontinued
- Provide temporary relief to entities from having to meet the separately identifiable requirement when an RFR instrument is designated as a hedge of a risk component

These amendments had no impact on the financial statements of the Company. The Company intends to use the practical expedients in future periods if they become applicable.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(b) New and amended to standards and Interpretations effective in the reporting period (Cont'd)****(ii) Covid-19-Related Rent Concessions beyond June 30, 2021 Amendments to IFRS 16**

On 28 May 2020, the IASB issued Covid-19-Related Rent Concessions - amendment to IFRS 16 Leases. The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the Covid-19 pandemic. As a practical expedient, a lessee may elect not to assess whether a Covid-19 related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the Covid-19 related rent concession the same way it would account for the change under IFRS 16, if the change were not a lease modification.

The amendment was intended to apply until June 30, 2021, but as the impact of the Covid-19 pandemic is continuing, on March 31, 2021, the IASB extended the period of application of the practical expedient to June 30, 2022. The amendment applies to annual reporting periods beginning on or after April 1, 2021. However, the Company has not received Covid-19-related rent concessions.

(c) Standards, Amendments to published Standards and Interpretations issued but not yet effective

Certain standards, amendments to published standards and interpretations have been issued that are mandatory for accounting periods beginning on or after January 1, 2022 or later periods and are not likely to have an impact on the Bank's financial statements.

(i) The following amendments are effective for the period beginning January 1, 2022:

- Onerous Contracts - Cost of Fulfilling a Contract (Amendments to IAS 37);
- Annual Improvements to IFRS Standards 2018-2020 (Amendments to IFRS 1, IFRS 9, IFRS 16 and IAS 41);
- Property, Plant and Equipment: Proceeds before Intended Use (Amendments to IAS 16); and
- References to Conceptual Framework (Amendments to IFRS 3).

(ii) The following amendments are effective for the period beginning January 1, 2023:

- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2);
- Deferred Tax Related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12).
- Definition of Accounting Estimates (Amendments to IAS 8); and
- IFRS 17 Insurance Contracts (effective January 1, 2023) - In June 2020, the IASB issued amendments to IFRS 17, including a deferral of its effective date to January 1, 2023.

(d) Use of estimates and judgements

The preparation of financial statements in compliance with adopted IFRS requires the use of certain critical accounting estimates. It also requires Company's management to exercise judgement in applying the Company's accounting policies. The areas where significant judgements and estimates have been made in preparing the financial statements and their effect are disclosed in note 4.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(d) Foreign currencies***Functional and presentation currency*

Items included in the financial statements are measured using Seychelles Rupee, the currency of the primary economic environment in which the entity operates ("functional currency"). The Financial Statements of the Company are presented in Seychelles Rupee, which is its functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing on the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Profit or Loss.

Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date the fair value was determined.

(e) Financial instruments**(i) Initial recognition**

Financial assets and liabilities, with the exception of loans and advances to customers and balances due to customers, are initially recognised on the trade date, i.e., the date on which the Company becomes a party to the contractual provisions of the instrument. This includes regular way trades, i.e., purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and advances to customers are recognised when funds are transferred to the customers' accounts. The Company recognises balances due to customers when funds are transferred to the Company.

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments. Financial instruments are initially measured at their fair value, except in the case of financial assets and financial liabilities recorded at FVTPL, transaction costs are added to, or subtracted from, this amount. Other receivables are measured at the transaction price.

(ii) Classification and measurement

The Company classifies all of its financial assets based on the business model for managing the assets and the asset's contractual terms, measured at either at Amortised Cost or Fair Value Through Other Comprehensive Income (FVTOCI).

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(e) Financial instruments (Cont'd)*****Financial Assets measured at Amortised Cost***

The Company measures Cash and cash equivalents, Loans and advances and Investment in financial assets and Other receivables at amortised cost only if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

Business model assessment

The Company determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective:

- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed;
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected); and
- Other factors considered by the Company in determining the business model for a group of assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel, the expected frequency and value and timing of sales.

The SPPI test

As a second step of its classification process the Company assesses the contractual terms of the financial asset to identify whether they meet the SPPI test.

Principal for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Company applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVTOCI.

Financial Liabilities measured at Amortised Cost

After initial measurement, debt issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issued funds, and costs that are an integral part of the Effective Interest Rate (EIR).

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(e) Financial instruments (Cont'd)****(ii) Classification and measurement (Cont'd)*****Undrawn loan commitments***

Undrawn loan commitments and letters of credits are commitments under which, over the duration of the commitment, the Company is required to provide a loan with pre-specified terms to the customer. Similar to financial guarantee contracts, these contracts are in the scope of the ECL requirements.

The nominal contractual value of undrawn loan commitments, where the loan agreed to be provided is on market terms, are not recorded in the Statement of Financial Position. The Company has not provided any commitment to provide loans at a below-market interest rate, or that can be settled net in cash or by delivering or issuing another financial instrument.

(iii) Reclassification of financial assets and liabilities

The Company does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Company acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified.

(iv) Derecognition of financial assets and liabilities***Derecognition of financial assets due to substantial modification of terms and conditions***

The Company sometimes renegotiates or otherwise modifies the contractual cash flows of loans to customers. When this happens, the Company assesses whether or not the new terms are substantially different to the original terms. The Company considers the following factors:

- If the borrower is in financial difficulty, whether the modification merely reduces the contractual cash flows to amounts the borrower is expected to be able to pay;
- Whether any substantial new terms are introduced, such as a profit share/equity-based return that substantially affects the risk profile of the loan;
- Significant extension of the loan term when the borrower is not in financial difficulty;
- Significant change in the interest rate; and
- Insertion of collateral, other security or credit enhancements that significantly affect the credit risk associated with the loan.

If the terms are substantially different, the Company derecognises the original financial asset and recognises a 'new' asset at fair value and recalculates a new effective interest rate for the assets. The date of renegotiation is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred. However, the Company also assesses whether the new financial asset recognised is deemed to be credit-impaired at initial recognition, especially in circumstances where the renegotiation was driven by the debtor being unable to make the originally agreed payments. Differences in the carrying amount are also recognised in Statement of Profit or Loss in net impairment of financial assets.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(e) Financial instruments (Cont'd)****(iv) Derecognition of financial assets and liabilities (Cont'd)**

If the terms are not substantially different, the renegotiation or modification does not result in derecognition, and the Company recalculates the gross carrying amount based on the revised cash flows of the financial asset and recognises a modification gain or loss in Statement of Profit or Loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets).

Financial asset derecognition other than on a modification

Financial assets, or a portion thereof, are derecognised when the contractual rights to receive the cash flows from the assets have expired, or when they have been transferred and either (i) the Company transfers substantially all the risks and rewards of ownership, or (ii) the Company neither transfers nor retains substantially all the risks and rewards of ownership and the Company has not retained control.

The Company enters into transactions where it retains the contractual rights to receive cash flows from assets but assumes a contractual obligation to pay those cash flows to other entities and transfers substantially all of the risks and rewards. These transactions are accounted for as 'pass through' transfers that result in derecognition if the Company:

- Has no obligation to make payments unless it collects equivalent amounts from the assets;
- Is prohibited from selling or pledging the assets; and
- Has an obligation to remit any cash it collects from the assets without material delay.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in Statement of Profit or Loss.

(v) Impairment of financial assets**(i) Overview of the ECL principles**

The Company records an allowance for Expected Credit Loss (ECL) for all loans and other debt financial assets not held at FVTPL, together with loan commitments and financial guarantee contracts as applicable, in this section all referred to as 'financial instruments'.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit losses or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit losses (12mECL). The Company's policies for determining if there has been a significant increase in credit risk are set out in note 3.3.3(f).

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(e) Financial instruments (Cont'd)****(v) Impairment of financial assets (Cont'd)****(i) Overview of the ECL principles (Cont'd)**

The 12mECL is the portion of LTECLs that represent the ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both LTECL and 12mECL are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments. The Company's policy for grouping financial assets measured on a collective basis is explained in note 3.3.3(b).

The Company has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. This is further explained in note 3.3.3(f).

Based on the above process, the Company groups its loans into Stage 1, Stage 2 and Stage 3 as described below:

Stage 1: When loans are first recognised, the Company recognises an allowance based on 12mECL. Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.

Stage 2: When a loan has shown a significant increase in credit risk since origination, the Company records an allowance for the LTECL. Stage 2 loans also include facilities, where the credit risk has improved and the loan has been reclassified from Stage 3.

Stage 3: Loans considered credit-impaired (as outlined in note 3.3.3(a)) The Company records an allowance for the LTECL.

(ii) The calculation of ECL

The Company calculates ECL based on probability of default (PD) to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

P D The Probability of Default (PD) is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio. The concept of PD is further explained in *note 3.3.3(c)*.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(e) Financial instruments (Cont'd)****(v) *Impairment of financial assets (Cont'd)*****(ii) The calculation of ECL (Cont'd)**

The mechanics of the ECL calculations are outlined below and the key elements are as follows:

EAD The Exposure at Default (EAD) is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments. The EAD is further explained in *note 3.3.3(d)*.

LGD The Loss Given Default (LGD) is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral or credit enhancements that are integral to the loan and not required to be recognised separately, as set out in *note 2.3(f)*. It is usually expressed as a percentage of the EAD. The LGD is further explained in *note 3.3.3(e)*.

The maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Company has the legal right to call it earlier.

Impairment losses and releases are accounted for and disclosed separately from modification losses or gains that are accounted for as an adjustment of the financial asset's gross carrying value.

Stage 1 - The 12mECL is calculated as the portion of LTECL that represent the ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Company calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original EIR.

Stage 2 - When a loan has shown a significant increase in credit risk since origination, the Company records an allowance for the LTECL. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.

Stage 3 - For loans considered credit-impaired (as defined in *note 3.3.3(a)*), the Company recognises the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(e) Financial instruments (Cont'd)****(v) *Impairment of financial assets (Cont'd)*****(ii) The calculation of ECL (Cont'd)**

Loan commitments and letters of credit - When estimating LTECL for undrawn loan commitments, the Company estimates the expected portion of the loan commitment that will be drawn down over its expected life. The ECL is then based on the present value of the expected shortfalls in cash flows if the loan is drawn down, based on a probability of default. The expected cash shortfalls are discounted at an approximation to the expected EIR on the loan. ECL for loan commitment is recognised within Provisions under other liabilities. To the extent that the combined expected credit losses exceed the gross carrying amount of the loan, the expected credit losses are recognised as a provision.

(iii) Purchased or originated credit impaired financial assets (POCI)

For POCI financial assets, the Company only recognises the cumulative changes in LTECL since initial recognition in the loss allowance.

(iv) Forward looking information

In its ECL models, the Company relies on a broad range of forward looking information as economic inputs, such as:

- GDP growth
- Unemployment rates

The inputs and models used for calculating ECL may not always capture all characteristics of the market at the date of the Financial Statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material. Information of actual input used to adjust PD are included on 3.3.3(c).

(vi) **Credit enhancements: collateral valuation and financial guarantees**

To mitigate its credit risks on financial assets, the Company seeks to use collateral, where possible. The collateral comes in various forms, such as cash and securities. Collateral, unless repossessed, is not recorded on the Company's Statement of Financial Position.

The Company does not use active market data for valuing financial assets held as collateral. It relies on other valuation models which do not have readily determinable market values as well as real estate and data provided by third parties mortgage valuers.

Cash flows expected from credit enhancements which are not required to be recognised separately by IFRS standards and which are considered integral to the contractual terms of a Financial Asset which is subject to ECL, are included in the measurement of those ECL. On this basis, the fair value of collateral affects the calculation of ECL. Collateral is generally assessed, at a minimum, at inception and re-assessed on practical basis by Management. However, some collateral, for example, cash or securities relating to margining requirements, is valued daily.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(e) Financial instruments (Cont'd)****(v) *Impairment of financial assets (Cont'd)***

Guarantees held are included in the measurement of loan ECLs when either they are specified in the contractual terms of the loan or else are integral to the loan, in that they formed part of the basis on which the loan was extended. Guarantees that are not integral to the loan's contractual terms are accounted as separate units of accounts subject to ECL.

(vi) Collateral repossessed

The Company's policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date, in line with the Company's policy.

In its normal course of business, the Company recover funds from the repossessed assets, generally at auction, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the residential properties under legal repossession processes are not recorded on the Statement of Financial Position.

(viii) Write-offs

Financial assets are written off either partially or in their entirety only when the Company has no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to credit loss expense.

(f) Cash and cash equivalents

Cash and cash equivalents comprise cash in hand and highly liquid financial assets that are subject to an insignificant risk of changes in their fair value and are used by the Company in the management of its short-term commitments. Cash and cash equivalents comprise cash on hand, balances with the Central Bank of Seychelles and amounts due from Company's on demand or with an original maturity of three months or less and Company overdrafts.

(g) Fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability or in the absence of a principal market, in the most advantageous market for the asset or liability. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

NOTES TO THE FINANCIAL STATEMENTS - YEAR ENDED DECEMBER 31, 2021

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(g) Fair value (Cont'd)**

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

(h) Property and equipment

Property and equipment are carried at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the assets' carrying amount or recognised as a separate asset as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

Depreciation is calculated on the straight line method to write off the cost of the assets to their residual values over their estimated useful life as follows:

	Years
Leasehold improvements	5
Furniture and fittings	3
Office equipment	5
Computer equipment	3
Motor vehicles	3

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount.

Gains and losses on disposals of property and equipment are determined by comparing the proceeds with their carrying amount and are included in the Statement of Profit or Loss.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(i) Leases**

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term.

The right-of-use assets are subject to impairment in line with the Company's policy as described in note 2(j) impairment of non-financial assets.

Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (less any lease incentives receivable), variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs.

(j) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses, if any. The useful lives of intangible assets are assessed as either finite or infinite.

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relate. All other expenditure is recognised in Statement of Profit or Loss when incurred.

Intangible assets are amortised on a straight-line basis in the Statement of Profit or Loss over their estimated useful lives, from the date that they are available for use. The estimated useful life of computer software for the current and comparative periods was 5 years. Intangible assets' residual value, useful life and amortisation methods are reviewed and adjusted if appropriate, at the end of each reporting period.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(k) Impairment of non-financial assets**

The Company assesses, at each reporting date, whether there is an indication that Property and equipment, Right of use asset, Intangible assets and Other assets may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. Impairment losses are recognised in the Statement of Profit or Loss.

(l) Taxation*Current tax*

Tax in the Statement of Profit or Loss relates to current year's tax which is the expected amount of tax payable in respect of taxable profit for the year and is measured using the tax rates that have been enacted at the end of the reporting period.

Deferred tax

Deferred tax is provided for using the liability method on all taxable temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. The principal temporary differences arise from depreciation of equipment, provision for credit impairment on loans and advances and provision for retirement benefit obligation.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled. The tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date are used to determine deferred tax.

Deferred tax assets are recognised to the extent that it is possible that future taxable profit will be available against which the temporary differences can be utilised.

(m) Employee benefits**(i) Short-term employee benefits**

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

NOTES TO THE FINANCIAL STATEMENTS - YEAR ENDED DECEMBER 31, 2021

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(m) Employee benefits (Cont'd)****(i) Short-term employee benefits (Cont'd)**

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of profit sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

(ii) Defined contribution plans

A defined contribution plan is a pension plan under which the Company pays a fixed contribution into a separate entity, i.e. the Seychelles Pension Fund. The Company has no legal or constructive obligations to pay further contributions if the funds do not hold sufficient assets to pay all employees the benefits relating to employees service in the current and prior periods.

(iii) Gratuity

The Company provides for a payment of compensation based on contractual terms for two years. The amount provisioned every year is based on the number of years the employee has worked after the last payment date. The liability recognised in the Statement of Financial Position is the present value of the defined obligation at the reporting date less fair value of plan assets together with adjustments for unrecognised actuarial gains and losses and past service costs.

(iv) Provision for length of service

Provision for compensation is provided as per the contractual terms as follows:

- a) Staff below management level, compensation equals 6%-10% of total salaries for two years.
- b) Staff above management level, compensation equals 10% - 15% of total salaries for two years.
- c) Chief Executive Officer, compensation equals 10% - 30% of total salaries for three years.

(n) Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit or Loss net of any reimbursement.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)**(o) Share capital**

Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset.

(p) Reserves**(i) Capital reserve**

The capital reserve originally arose from contra credit entries to net assets transferred from SHDC to the Company at nil consideration in 2005. Subsequent movements represent further additions to properties transferred from the Government of Seychelles also at nil consideration and cash grants. It also includes revaluations by Directors of assets previously transferred.

(ii) Regulatory reserve

The Company provides for additional ECL when computation under IFRS 9 is less than the the provisioning requirement in accordance with the Financial Institution (Credit Classification and Provisioning) Regulations, (as ammended), to a non-distributable reserve.

(q) Interest income and expense**(i) The effective interest rate (EIR) method**

Under IFRS 9, interest income is recorded using the EIR method for all financial assets measured at amortised cost. Interest income on interest bearing financial assets measured at FVOCI under IFRS 9 is also recorded using the EIR method. Interest expense is also calculated using the EIR method for all financial liabilities held at amortised cost. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset or liability or, when appropriate, a shorter period, to the gross carrying amount of the financial asset.

The EIR (and therefore, the amortised cost of the financial asset) is calculated by taking into account transaction costs and any discount or premium on the acquisition of the financial asset, as well as fees and costs that are an integral part of the EIR. The Company recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, the EIR calculation also takes into account the effect of potentially different interest rates that may be charged at various stages of the financial asset's expected life, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

If expectations of fixed rate financial assets' or liabilities' cash flows are revised for reasons other than credit risk, then changes to future contractual cash flows are discounted at the original EIR with a consequential adjustment to the carrying amount. The difference from the previous carrying amount is booked as a positive or negative adjustment to the carrying amount of the financial asset or liability on the Statement of Financial Position with a corresponding increase or decrease in Interest revenue/expense calculated using the effective interest method.

For floating-rate financial instruments, periodic re-estimation of cash flows to reflect the movements in the market rates of interest also alters the effective interest rate, but when instruments were initially recognised at an amount equal to the principal, re-estimating the future interest payments does not significantly affect the carrying amount of the asset or the liability.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

(q) Interest income and expense (Cont'd)

(ii) Interest and similar income/expense

Net interest income comprises interest income and interest expense calculated using both the effective interest method and other methods. These are disclosed separately on the face of the Statement of Profit or Loss for both interest income and interest expense to provide symmetrical and comparable information.

In its interest income/expense calculated using the effective interest method, the Company only includes interest on those financial instruments that are set out in note 2(q)(i) above.

Interest income/expense on all trading financial assets/liabilities is recognised as a part of the fair value change in 'Net trading income'.

The Company calculates interest income on financial assets, other than those considered credit-impaired, by applying the EIR to the gross carrying amount of the financial asset.

When a financial asset becomes credit-impaired as set out in note 3.3.3(a) and is therefore regarded as 'Stage 3', the Company calculates interest income by applying the EIR to the net amortised cost of the financial asset. If the financial asset cures (as outlined in note 3.3.3(a)) and is no longer credit-impaired, the Company reverts to calculating interest income on a gross basis. However, during the year, the Company recomputed interest on a gross basis.

(u) Fees and commission

Fees and commissions are recognised on an accrual basis when the service has been provided. Commission and fees arising from negotiating, or participating in the negotiations of a transaction for a third party, such as the acquisition of loans, shares or other securities or the purchase or sale of businesses, are recognised on completion of the underlying transaction.

Loan processing fees is recognised as income in the period when the loan is processed. Management does not amortise loan fees and believes that impact of non amortisation is immaterial.

3. FINANCIAL RISK MANAGEMENT

3.1 Financial risk factors and management

The activities of the Company expose it to different financial risk, market risk (including currency and fair value interest risk), credit risk and liquidity risk. The Directors have the overall responsibility for the establishment, overseeing and monitoring of the Company's risk management framework and are assisted by the senior management policies, which are approved by the Directors.

The Company's risk management policies are established to identify and analyse the risk faced by the Company focusing on the unpredictability of financial markets, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities and its role in the Republic of Seychelles.

NOTES TO THE FINANCIAL STATEMENTS - YEAR ENDED DECEMBER 31, 2021

3. FINANCIAL RISK MANAGEMENT (CONT'D)

3.1 Financial risk factors and management (Cont'd)

The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations. The following are the Company's exposure to each of the above risks, the Company's objective, policies and process for measuring and managing risk, and the Company's management of capital. Further quantitative disclosures are included throughout these financial statements.

3.2 Interest rate risk

The Company takes term loans at floating rates and for various periods and earns interest margins by providing finance to the housing sector. The Company seeks to increase interest margins by rolling over short-term funds and lending for longer periods at higher rates.

(a) Interest sensitivity gap is as follows:

At December 31, 2021

	Less than 1 year SR	Between 1 and 3 years SR	Greater than 3 years SR	Non-interest bearing SR	Total SR

Less: Allowances for credit impairment (note 6(c))					<u>(43,015,228)</u>
					<u>407,470,001</u>

The Company is exposed to the effects of mismatch in tenure on term loans obtained from commercial banks, interest on deposits and loans advanced to customers. Increase in interest rates on interest from commercial banks results in reduction of net interest. Decrease in interest rate on commercial banks have an effect of increasing interest margin.

(b) Sensitivity analysis

If interest rates had been 5 points higher/lower and all other variables were held constant as at year-end, the Companies' results would have been increased/decreased as follows:

	2021 SR	2020 SR
Decrease/Increase	<u>19,204</u>	<u>18,176</u>

3. FINANCIAL RISK MANAGEMENT (CONT'D)

3.3 Credit risk

3.3. Credit risk management

Credit risk is the risk that the Company will incur a loss because its customers or counterparties fail to discharge their contractual obligations. The Company structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower.

The Company has established a credit quality review process to provide identification of the creditworthiness of counterparties. There is regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment and of collateral and guarantees.

Credit risk arises from cash and cash equivalents, contractual cash flows of debt investments carried at amortised cost as well as credit exposures to customers, including outstanding receivables.

3.3. Risk concentration risk and exposure to credit risk

Also credit risk arises from commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans. With respect to credit risk on commitments to extend credit, the Company is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers continuously adhering to specific credit standards.

The Company monitors the term to maturity of credit commitments because longer term commitments generally have a greater degree of credit risk than shorter term commitments.

The Company's concentration risk is managed by client and segments.

NOTES TO THE FINANCIAL STATEMENTS - YEAR ENDED DECEMBER 31, 2021

3. FINANCIAL RISK MANAGEMENT (CONT'D)

3.3 Credit risk (Cont'd)

3.3.2 Risk concentration and exposure to credit risk (Cont'd)

The Company takes on exposure to credit risk which is the risk that a counterparty will be unable to pay amounts in full when due. The Company structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower. Such risks are monitored on a revolving basis and subject to an annual or more frequent review. Limits on the level of credit risk are approved by the Board of Directors with discretionary limits set for the Companies' Management.

Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these limits where appropriate. Exposure to credit risk is also managed by obtaining collateral and personal guarantees.

(a) The table that follow shows the maximum exposure of financial assets to credit risk for the components of the Statement of Financial Position and commitments.

Description	2021		2020			
	Gross exposure	E C L	Net exposure	Gross exposure	E C L	Net exposure

Total credit impaired assets	629,851,954	43,015,228	586,836,726	435,744,713

For ECL, the deemed fair value is the value of collateral after applying Company Hair Cut at the reporting date. As at December 31, 2021, the Company applied a hair cut of 45% (2020: 50%).

NOTES TO THE FINANCIAL STATEMENTS - YEAR ENDED DECEMBER 31, 2021

3. FINANCIAL RISK MANAGEMENT (CONT'D)**3.3 Credit risk (Cont'd)****3.3.3 Impairment assessment**

The Company's impairment assessment and measurement approach is set out below. It should be read in conjunction with the summary of significant accounting policies *note 2(e)(v)*.

(a) Definition of default, impaired and cure

The Company considers a financial instrument defaulted for ECL calculations in all cases when the borrower becomes 90 days past due on its contractual payments. The Company considers treasury and intercompany balances defaulted and takes immediate action when the required intraday payments are not settled by the close of business as outlined in the individual agreements.

The Company has aligned its definition of credit impaired assets under IFRS 9 to prudent global definition of non-performing loans ('NPLs').

As a part of a qualitative assessment of whether an exposure is credit-impaired, the Company also considers a variety of instances that may indicate unlikeliness to pay. When such events occur, the Company carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate. Such events include:

- The borrower having past due liabilities to public creditors or employees;
- The borrower is deceased;
- A material decrease in the underlying collateral value where the recovery of the loan is expected from the sale of the collateral;
- A covenant breach not waived by the Company; and
- The debtor is filing bankruptcy application/protection.

It is the Company's policy to consider a financial instrument as 'cured' and therefore re-classified out of Stage 3 when none of the default criteria have been present unless there are quantitative or qualitative that disallow immediate cure. The decision whether to classify an asset as Stage 2 or Stage 1 once cured depends on the updated credit grade, at the time of the cure, and whether this indicates there has been a significant increase in credit risk compared to initial recognition.

(b) Grouping financial assets

The Company calculates the allowance for ECL either on a collective or an individual basis dependent on the factors below.

Asset classes where the Company calculates ECL on an collective basis include:

Total loan receivable (including accrued interest excluding interest on NPA) is allocated into 5 segments based on the industry in which customer is operating as below:

- (i) Home loan - Secured
- ii) Home loan - Unsecured
- iii) SHDC - Secured loans
- iv) Pensioner + SHRLS - Unsecured
- v) Staff loan

NOTES TO THE FINANCIAL STATEMENTS - YEAR ENDED DECEMBER 31, 2021

3. FINANCIAL RISK MANAGEMENT (CONT'D)

3.3 Credit risk (Cont'd)

3.3.3 Impairment assessment (Cont'd)

(b) Grouping financial assets (Cont'd)

Asset classes where the Company calculates ECL on an individual basis include:

- i) Cash and bank balances (Balance due from local banks)
- ii) Investments in financial assets (Sovereign Debt and Financial Institutions)
- iii) Other receivables

(c) The Company's internal rating and Probability of Default (PD) estimation process

The Company allocates each exposure to credit risk grade based on a variety of data that is determined to be predictive of risk of default and applying experienced credit judgement. For the loans and advances, credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors vary depending on the nature of the exposure and the type of the borrower.

(i) Company's grading

The Company allocates each exposure to credit risk grade based on a variety of data that is determined to be predictive of risk of default and applying experienced credit judgement.

In particular grading of loans and advances is based on the modified Central Bank of Seychelles grading guidelines aligning to the Company's Days Past Due (DPD) days as below:

C B S grading	Company grading	DPD Date	Staging
Pass	High grade to Standard	0 - 30	Stage 1
Special mention	Sub standard,	31 - 90	Stage 2
Sub standard,	Non performing loans	91 - 180	Stage 3
Doubtful	Non performing loans	181 - 365	Stage 3
Loss	Non performing loans	> 365	Stage 3

Grading of other financial assets is based on Moody rating where gradings from 1-4 is classified as high grade, 5-16 as standard grade, 17-19 as sub standard grading and 20 as non performing.

(ii) Computation of PDs for loans and advances

The Company compute the historical default rates based on movement of loans receivable from ageing buckets. These average flow rates are then used to determine the credit loss rate (determined as a product of the average flow rates for the applicable brackets).

The Company considered monthly ageing from November 2014 to December 2021 and ageing bucket for carrying analysis of movement in its loan's receivables. Total loan receivable for each sector is bifurcated in following ageing bucket: Not due, 1 - 30 days, 31 to 60 days, 61 to 90 days, more than 90 days. The Directors have estimated that the economic outlook and historic loss rates at December 31, 2021 were not significantly different to December 31, 2020.

NOTES TO THE FINANCIAL STATEMENTS - YEAR ENDED DECEMBER 31, 2021

3. FINANCIAL RISK MANAGEMENT (CONT'D)

3.3 Credit risk (Cont'd)

3.3.3 Impairment assessment - Computation of PDs for loans and advances (Cont'd)

PDs were arrived by the following steps

Step 1: Plotting the total loan receivable into ageing buckets for the period;

Step 2: Calculation of average default rate per time bucket: Average default rate is computed for each month by comparing the movement of ageing in the next month;

Step 3: Computation of impairment loss and average default rate: Impairment loss and average default rate is computed for December 2015, December 2016, December 2017, December 2018, December 2019, December 2020 and 2021.

Step 4: Analysis of forward-looking information for each sector is performed using regression analysis between historical loss rate applicable to sector vis a vis unemployment.

Step 5: Computation of ECL rate for provision

(i) Life time expected credit loss is used for the portfolio classified under Stage 2. 'ECL provision identified for each sector is computed based on adjusted loss rate from Step 4 and applied to sector portfolio of loan receivables categorised under stage 2 category as at the reporting date.

(ii) Life time expected credit loss for the portfolio classified under Stage 3: 'ECL provision of 100% is applied to sector portfolio of loan receivables under stage 3 as at the reporting date.

(iii) 12 month expected credit loss (ECL) is used in the portfolio classified under Stage 1. Life time ECL is computed for each sector by multiplying the 12-month ECL rate.

(iii) *PD for Financial Institutions*

PD for financial institutions - No loss in the past as well as based on available information, the likelihood that there is loss due to default is remote. The Directors view expected credit loss to be immaterial.

(d) Exposure at default

The exposure at default (EAD) represents the gross carrying amount of the financial instruments subject to the impairment calculation, addressing both the client's ability to increase its exposure while approaching default and potential early repayments too.

To calculate the EAD for a Stage 1 loan, the Company assesses the possible default events within 12 months for the calculation of the 12mECL. However, if a Stage 1 loan that is expected to default in the 12 months from the Statement of Financial Position date and is also expected to cure and subsequently default again, then all linked default events are taken into account. For Stage 2 and Stage 3 financial assets, the exposure at default is considered for events over the lifetime of the instruments.

ECL computation exposure is discounted as below:

(i) 12 months ECL - Present value of ECL for each individual loan is computed based on remaining maturity period as at each reporting period (maximum period for discounting is capped at 12 month/365 days) using interest rate of respective loan.

(ii) Present value of ECL for each individual loan is computed based on remaining maturity period as at each reporting period using interest rate of respective loan.

NOTES TO THE FINANCIAL STATEMENTS - YEAR ENDED DECEMBER 31, 2021

3. FINANCIAL RISK MANAGEMENT (CONT'D)**3.3 Credit risk (Cont'd)****3.3.3 Impairment assessment (Cont'd)****(e) Loss given default (LGD)****(i) *LGD for loans and advances***

The Company consider the secured portion of loan receivables as fair value of collaterals as at each reporting period divided by total loan receivables including interest multiplied by 100 i.e. Loss given default (%) = 100% exposure minus secured portion of loan receivables (%).

Fair value is derived by discounting 45% of the carrying amount of collaterals (2020: 50%). Additional 5% is further adjusted from book value of collateral as cost expected to be incurred for selling collaterals. The haircutting however excludes special product of pensioners where 25% of the proceeds are recovered from the Government of Seychelles.

Fair value of security in the form of guarantor are taken as Nil for the purpose of ECL computation.

(ii) *LGD for Financial Institutions and Sovereign Debt*

- Based on Basel standardized approach applicable to all financial institutions.

(f) Significant increase in credit risk

The Company continuously monitors all assets subject to ECL. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Company assesses whether there has been a significant increase in credit risk since initial recognition.

The Company uses the number of days past due (DPD) to determine significant in credit risk. Credit ratings are assigned to facilities granted by sectors upon initial recognition based on available information.

Credit risk is deemed to have increased significantly if credit ratings have deteriorated at the reporting date. When estimating ECLs on a collective basis for a group of similar assets (as set out in note 3.3.3(b)), the Company applies the same principles for assessing whether there has been a significant increase in credit risk since initial recognition.

The Company also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset, such as moving a customer/facility to the watch list, or the account becoming forborne. In certain cases, the Company may also consider that events explained in note 3.3.3(b) are a significant increase in credit risk as opposed to a default. Regardless of the change in credit grades, if contractual payments are more than 30 days past due, the credit risk is deemed to have increased significantly since initial recognition.

3.4 *Liquidity risk*

The Company is exposed to call back of term loans from commercial banks. The Board sets limits on the ratio of borrowing for loans and advances. Prudent liquidity risk management implies maintaining sufficient cash and availability of funding through an adequate amount of committed credit facilities. Furthermore, Management monitors rolling forecasts of the Company's liquidity reserve on the basis of expected cash flows.

The table below analyses the Company's financial exposure into relevant maturity groupings based on the remaining period at the end of the reporting period to the contractual maturity date.

NOTES TO THE FINANCIAL STATEMENTS - YEAR ENDED DECEMBER 31, 2021

3. FINANCIAL RISK MANAGEMENT (CONT'D)**3.5 Currency risk**

Currency risk is defined as the risk that movements in foreign exchange rates adversely affect the value of the Company's foreign currency positions. The Company is not exposed to foreign exchange risk as the earnings and expenses of the Company are Seychelles Rupees which is the Company's functional and presentation currency.

Also the Company's total portfolio of financial assets and liabilities are denominated in Seychelles Rupees. Therefore currency risk is considered negligible.

3.6 Fair value estimation

The carrying amounts of financial assets and liabilities of the Company at reporting date approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Company for similar financial instruments.

3.7 Capital risk management

The Company's objectives when managing capital are:

- to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders, and
- to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The Company sets the amount of capital in proportion to risk. It manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt. The Company monitors capital on the basis of the debt-to-adjusted capital ratio. This ratio is calculated as net debt adjusted capital. Net debt is calculated as total debt less cash and cash equivalents. Adjusted capital comprises all components of equity (i.e. share capital, retained earnings and capital reserve).

During 2021, the Company's strategy, which was unchanged from 2020, was to maintain the debt-to-adjusted capital ratio at a reasonable level in order to secure access to finance at a reasonable cost. The debt-to-adjusted capital ratios were as follows:

	<u>2021</u>	<u>2020</u>
	SR	SR
Total debt (note 14)	51,929,054	74,210,539
Less: Cash and cash equivalents (note 5)	<u>(41,065,909)</u>	<u>(33,847,976)</u>
Net debt	<u>10,863,145</u>	<u>40,362,563</u>
Total equity	<u>418,665,058</u>	<u>407,470,001</u>
Debt-to-adjusted capital ratio	<u>3%</u>	<u>10%</u>

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of the Company's financial statements requires Management to make judgements, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the Company's disclosures, as well as the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Estimates and judgements are continuously evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

4.1 Allowance for expected credit losses (ECL)

The measurement of impairment losses under IFRS 9 requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes which can result in different levels of allowances.

The Company's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The Company's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be, measured on a life time Expected Credit Losses (LTECL) basis and the qualitative assessment;
- The segmentation of financial assets when their ECL is assessed on a collective basis;
- Development of ECL models, including the various formulas and the choice of inputs;
- Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs; and
- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models.

It has been the Company's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

4.2 Business model assessment

Classification and measurement of financial assets depends on the results of the SPPI and the business model test. The Company determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONT'D)

(a) *Impairment losses on financial assets (Cont'd)*

4.2 *Business model assessment (Cont'd)*

The Company monitors financial assets measured at amortised cost prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Company's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets. No such changes were required during the periods presented.

4.3 *Going concern*

The Company's Management has made an assessment of its ability to continue as a going concern and is satisfied that it has the resources to continue in business for the foreseeable future. Furthermore, Management is not aware of any material uncertainties that may cast significant doubt on the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

4.4 *Asset lives and residual values*

Property, plant and equipment are depreciated over their useful lives taking into account residual values, where appropriate. The actual lives of the assets and residual values are assessed annually and may vary depending on a number of factors. In reassessing asset lives, factors such as technological innovation, product life cycles and maintenance programmes are taken into account. Residual value assessments consider issues such as future market conditions, the remaining life of the asset and projected disposal values. Consideration is also given to the extent of current profits and losses on the disposal of similar assets.

4.5 *Capital Reserve*

Investment properties and cash are granted to the Company by the Government of Seychelles. The corresponding credits are accounted under Capital Reserve. Capital reserve also includes revaluation of assets previously granted to the Company.

4.6 *Length of service compensation*

The amendments to the Seychelles Employment Act in the year 1999 entitled one day wage for each completed month of service provided the employee has completed five years continuous service. The Company accrues this liability on a current basis and carries it to a provision account for payments to be made as and when they occur. The Directors have estimated that the amount of the liability provided will not be materially different had it been computed by an external Actuary.

4.7 *Impairment of non financial assets*

At each financial reporting year end, the Company's Management reviews and assesses the carrying amounts of other assets and where relevant, write them down to their recoverable amounts based on best estimates.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONT'D)

4.8 Fair value estimation

The fair value of financial instruments traded in active markets is based on quoted market prices at the end of the reporting period. A market is regarded as active if quoted prices are readily and regularly available from for example, a stock exchange and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Company is the current bid price. These instruments are included in level 1. Instruments included in level 1 comprise primarily quoted equity investments classified as trading securities or available-for-sale classified as trading securities or available-for-sale.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

4.9 Limitation of sensitivity analysis

The sensitivity analysis demonstrate the effect of a change in a key assumption while other assumptions remain unchanged. In reality, there is a correlation between the assumptions and other factors. It should also be noted that these sensitivities are non-linear and larger or smaller impacts should not be interpolated or extrapolated from these results.

The sensitivity analysis do not take into consideration that the Company's assets and liabilities are actively managed. Other limitations include the use of hypothetical market movements to demonstrate potential risk that only represent the Company's views of possible near-term market changes that cannot be predicted with any certainty.

5. CASH AND BANK BALANCES

	<u>2021</u>	<u>2020</u>
	SR	SR
Cash in hand	14,600	14,600
Balances with local banks	41,051,309	33,833,376
Cash and cash equivalents	<u>41,065,909</u>	<u>33,847,976</u>

- (a) Cash and bank balances are denominated in Seychelles Rupees. Banks in Seychelles have been performing well during the period under review and are standard graded per the Company internal rating. Cash and bank balances historic default rates are nil and Directors have considered ECL to be immaterial.

NOTES TO THE FINANCIAL STATEMENTS - YEAR ENDED DECEMBER 31, 2021

8. LEASES

- (a) The Company has lease contracts for its Head Office and Praslin branch used in its operations. The lease term is for 2 years and the Company's obligations under these leases are secured by the lessor's title to the leased assets. The Company's Head Office lease agreement expired effective August 31, 2020 and is yet to be renewed. The lease contract expiration was considered short-term and fell under the exemption clause of IFRS 16.
