### **OPINION OF THE AUDITOR GENERAL ON THE FINANCIAL STATEMENTS OF THE CENTRAL BANK OF SEYCHELLES FOR THE YEAR ENDED 31 DECEMBER 2025**

#### **Opinion**

The accompanying financial statements as set out on pages 5 to 109, which comprise of the statement of financial position as at 31 December 2025, statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies, have been audited on my behalf by Grant Thornton UAE auditors, appointed under Section 19 of the Auditor General Act, 2010 read with Section 47(3) of the Central Bank of Seychelles Act, 2004 (as amended). As per the agreement with the auditors, they have reported to me the results of their audit and on the basis of their report, I am satisfied that all information and explanations which, to the best of my knowledge and belief, where necessary for the purpose of the audit have been obtained.

Accordingly, in my opinion,

- (a) proper accounting records have been kept by the Bank as far as it appears from examination of those records; and
- (b) the financial statements give a true and fair view of the financial position of the Bank as at 31 December 2025 and of its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards and comply with the Central Bank of Seychelles Act, 2004 (as amended).

#### **Basis for Opinion**

The audit was conducted in accordance with the International Standards on Auditing (ISAs). My responsibilities under those standards are further described in the 'Auditor-General's responsibilities for the audit of financial statements' section of my report. I am independent of the Bank in accordance with the INTOSAI Code of Ethics applicable to its members, together with other ethical requirements that are relevant to the audit of financial statements in Seychelles, together with other ethical requirements that are relevant to the audit of financial statements in Seychelles. I believe that the audit evidence obtained is sufficient and appropriate to provide a basis for my opinion.

## **Other Information**

The Board of Directors is responsible for the other information which comprises the information included in the annual report. The other information does not include the financial statements and my auditor's report thereon.

My opinion on the financial statements does not cover the other information and I do not express any form of assurance or conclusion thereon.

In connection with the audit of the financial statements, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or the knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work performed on the other information that was obtained prior to the date of the audit report, I conclude that there is a material misstatement of this other information, I am required to report that fact. I have nothing to report in this regard.

## **Responsibility of the Board of Directors of the Bank for the Financial Statements**

The Board of Directors is responsible for the preparation of the financial statements that give a true and fair view in accordance with IFRS Accounting Standards and in compliance with the requirements of the Central Bank of Seychelles Act, 2004, (as amended) and for such internal control as Board of Directors determine is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in accordance with Part IV of the Central Bank of Seychelles Act 2004, (as amended).

## **Responsibilities of the Auditor General**

The audit objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and issue an auditor's report in accordance with the Central Bank of Seychelles Act, 2004 (as amended). Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of the audit in accordance with ISAs, the auditor exercises professional judgement and maintains professional scepticism throughout the audit. The auditor also:

- Identifies and assesses that risk of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtains audit evidence that is sufficient and appropriate to provide a basis for the opinion. The risk of not detecting material misstatement resulting from fraud is higher than one resulting from error, as fraud may involve collusion, forgery, intentional omission or misrepresentation, or the override of internal control;
- obtains an understanding of the internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control;
- evaluates the appropriateness of the accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors;
- concludes on the appropriateness of the Board of Directors' use of going concern basis of accounting and, based on the audit evidence obtained, concludes whether a material uncertainty exists relating to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If the auditor concludes that a material uncertainty exists, the auditor is required to draw attention in the auditor's report to the related disclosures in the financial statements or if such disclosures are inadequate, to modify the opinion. My conclusions are based on audit evidence obtained to the date of my auditor's report. However, future unforeseeable events or conditions may cause the Bank to cease to continue as a going concern;
- evaluates the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation;
- obtains sufficient appropriate audit evidence regarding the financial information of the entity or business activities within the Bank to express an opinion on the financial statements. The auditor is responsible for the direction, supervision and performance of the audit. I remain responsible for the audit opinion;
- communicates with directors among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that are identified during the audit.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

## **CENTRAL BANK OF SEYCHELLES**

### **NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025**

#### **1. GENERAL INFORMATION**

The Central Bank of Seychelles (the “Bank”) is established and domiciled in the Republic of Seychelles. The address of its registered office is Independence Avenue, Victoria, Mahé, Seychelles. The Bank is established by statute under Section 3 of the CBS Act, 2004, as amended, hereafter referred to as the CBS Act. Section 3 of the CBS Act states; “there is hereby established the Central Bank of Seychelles which shall be a body corporate with perpetual succession and a common seal.”

The financial statements for the year ended 31 December 2025 have been approved for issue by the Board of Directors on 24 March 2026. Neither the Bank nor the Government of Seychelles (Government) has the power to amend the financial statements after issue.

The primary objective of the Bank is to promote domestic price stability.

The other objectives of the Bank are to promote financial stability and soundness of the financial system of Seychelles.

#### **2. CHANGES IN ACCOUNTING POLICIES**

Except for the changes below, the Bank has consistently applied the accounting policies set out in Note 3 to all periods presented in these financial statements.

The Bank has adopted the following new standards and amendments to standards with a date of initial application of 1 January 2025.

<b>Standards/Interpretation</b>		<b>Effective date Periods beginning on or after</b>
Amendments to IAS 21	Lack of Exchangeability	1 January 2025

The implementation of amendments to International Accounting Standards (“IAS”) 21 did not have a significant impact on the financial statements of the Bank for the year ended 31 December 2025.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***3. NEW STANDARDS AND INTERPRETATIONS NOT YET ADOPTED**

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning on or after 1 January 2026. Those which may be relevant to the Bank are set out and the Bank is of the opinion that the impact of their application will be as set out below. The Bank does not plan to early adopt these standards, they will be adopted in the period that they become mandatory unless otherwise indicated.

	<b>Standard/Interpretation</b>	<b>Effective date Periods beginning on or after</b>
Amendments to IFRS 7 and IFRS 9	Classification and Measurement of Financial Instruments	1 January 2026
IFRS 18	Presentation and Disclosure in Financial Statements	1 January 2027

**3.1 Amendments to IFRS 7 and IFRS 9: Classification and Measurement of Financial Instruments**

The amendments aim to enhance the classification, derecognition, and disclosure of financial instruments. The amendments address several key areas:

- To allow entities to derecognise a financial liability settled through electronic payment systems before the actual settlement date if specific criteria are met;
- To introduce clearer guidance on classifying financial assets, particularly those with contingent features related to environmental, social, and governance (ESG) matters, by introducing an additional Solely Payments of Principal and Interest (SPPI) criterion, under which certain financial assets could now meet the SPPI criterion;
- Additional disclosure requirements have been introduced to improve transparency regarding investments in equity instruments designated at fair value through other comprehensive income, which aims to provide better information to investors about the nature and risks associated with these financial instruments;
- To provide clarity on the key aspects of Contractually Linked Instruments (CLIs), distinguishing them from financial assets with non-recourse features.

The amendments are effective for annual reporting periods beginning on or after 1 January 2026 and must be applied retrospectively. The Bank is currently assessing the impact the amendments will have on the financial statements.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***3. NEW STANDARDS AND INTERPRETATIONS NOT YET ADOPTED (CONTINUED)****3.2 Amendments to IFRS 18: Presentation and Disclosure in Financial Statements**

The amendments aim to improve the usefulness of information presented in financial statements through improved presentation and disclosure. Additionally, it aims to improve financial reporting by requiring additional defined subtotals in the statement of profit or loss, disclosures about management-defined performance measures, and adding new principles for grouping information, thus providing relevant information that enhances transparency in financial performance.

The amendments are effective for annual reporting periods beginning on or after 1 January 2027 and must be applied retrospectively. The Bank is currently assessing the impact the amendments will have on the financial statements.

**4. MATERIAL ACCOUNTING POLICIES**

The material accounting policies applied in the preparation of these financial statements are set out below. Policies disclosed are those which are deemed by the Bank to be material if omitting, misstating or obscuring them could reasonably be expected to influence decisions that the primary users of these financial statements make on the basis of these reports. These accounting policies have been consistently applied to all the years presented unless otherwise stated.

**4.1 Basis of preparation**

In accordance with Section 45(2) of the CBS Act, the financial statements of the Bank shall be maintained at all times in conformity with the applicable law, if any, and an internationally recognised financial reporting framework.

The financial statements have been prepared in accordance with IFRS Accounting Standards as issued by International Accounting Standards Board ("IASB") and the CBS Act.

The disclosures on risks from financial instruments are presented in the financial risk management disclosures contained in Note 46.

The financial statements comprise the statement of financial position, the statement of profit or loss and other comprehensive income, the statement of changes in equity, the statement of cash flows and the notes as per IFRS Accounting Standards as issued by IASB, as well as the statement of distribution in accordance with the CBS Act.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.1 *Basis of preparation (continued)***

The preparation of financial statements in conformity with IFRS Accounting Standards as issued by IASB requires the use of certain critical accounting estimates which are reviewed and updated as and when required. It also requires Management to exercise its judgement in the process of applying the Bank's accounting policies. Changes in assumptions may have a material impact on the financial statements in the period the assumptions changed. Management believes that the underlying assumptions for the year are appropriate and that the Bank's financial statements therefore present the financial position and results fairly. The areas involving a higher degree of judgement and complexity, or areas where assumptions and estimates are material to the financial statements, are disclosed in Note 5.

**4.2 *Foreign currency translation*****(a) Functional and presentation currency**

Items included in the Bank's financial statements are measured using the currency of the primary economic environment in which the Bank operates (the functional currency). The financial statements are presented in Seychelles Rupees ("SCR"), rounded to the nearest thousand, which is the Bank's functional and presentation currency.

**(b) Transactions and balances**

Transactions denominated in foreign currencies are translated into SCR and recorded at the rates of exchange prevailing at the dates of the transactions. Monetary items denominated in foreign currencies are translated into SCR at the closing exchange rates ruling on the reporting date.

Foreign exchange differences, resulting from the settlement of foreign currency transactions and from the translation at year end closing exchange rates of monetary assets and liabilities denominated in foreign currencies, are recognised in profit or loss. All foreign exchange gains and losses recognised in profit or loss are presented net.

Unrealised foreign exchange gains and losses are transferred from retained earnings to revaluation reserve, in accordance with the CBS Act, as these are not allowed for distribution. Unrealised foreign exchange gains and losses consist of revaluation of monetary assets and liabilities denominated in foreign currencies as a result of translation. Where financial assets at fair value through profit or loss ("FVTPL") are re-invested, and the portfolios are not exited, the foreign exchange gains and losses as a result of translation are treated as unrealised.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.2 Foreign currency translation (continued)****(b) Transactions and balances (continued)**

Realised foreign exchange gains and losses are considered for distribution in accordance with the CBS Act (see Note 6). These realised foreign exchange gains and losses result from the settlement of foreign currency receipts and payments as well as foreign exchange gains or losses, due to price movements on financial assets at FVTPL disposed of during the year.

The exchange rate of the SCR is determined by the market, and the rates applied on all foreign currency transactions are the weighted average traded exchange rates of authorised dealers, which are banks and bureau de change, except for the IMF SDR ("XDR") rate, which applies the international market rate. The XDR is defined in terms of a basket of currencies. Its value is determined as the weighted sum of exchange rates of the five major currencies (Euro, Japanese Yen, British Pound Sterling, United States Dollar and Chinese Yuan Renminbi). For accounting purposes, XDR is treated as a foreign currency.

The following rates of exchange were applied:

	<b>31 December 2025</b>	31 December 2024
IMF Special Drawing Rights	<b>XDR 1 = SCR 20.4261</b>	XDR 1 = SCR 19.3225
United States Dollar	<b>USD 1 = SCR 14.9150</b>	USD 1 = SCR 14.8167
British Pound Sterling	<b>GBP 1 = SCR 20.0551</b>	GBP 1 = SCR 18.6708
Euro	<b>EUR 1 = SCR 17.4426</b>	EUR 1 = SCR 15.3853
Australian Dollar	<b>AUD 1 = SCR 9.9513</b>	AUD 1 = SCR 9.1641
Canadian Dollar	<b>CAD 1 = SCR 10.8701</b>	CAD 1 = SCR 10.2961
South African Rand	<b>ZAR 1 = SCR 0.9097</b>	ZAR 1 = SCR 0.8105
Chinese Yuan Renminbi	<b>CNY 1 = SCR 2.1343</b>	CNY 1 = SCR 2.0299
Chinese Yuan Renminbi (offshore)	<b>CNH 1 = SCR 2.1373</b>	CNH 1 = SCR 2.0195

**4.3 Financial instruments**

A financial instrument is defined as any contract that gives rise to both a financial asset of one entity and a financial liability or equity instrument of another entity. The Bank recognises all financial instruments on its statement of financial position when it becomes a party to the contractual provision of the instrument.

**(a) Initial recognition of financial assets and liabilities**

Financial assets and financial liabilities are recognised when the entity becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets designated at FVTPL are recognised on settlement-date. In line with settlement-date accounting for financial assets designated at FVTPL, any fair value gains or losses between trade-date and settlement-date are recognised in profit or loss.

## CENTRAL BANK OF SEYCHELLES

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

#### 4. MATERIAL ACCOUNTING POLICIES (CONTINUED)

##### 4.3 *Financial instruments (continued)*

###### (a) Initial recognition of financial assets and liabilities (continued)

At initial recognition, the Bank measures a financial asset or financial liability at its fair value plus or minus, in the case of a financial asset or financial liability not at FVTPL, transaction costs that are incremental and directly attributable to the acquisition or issue of the financial asset or financial liability, such as fees and commissions. Transaction costs of financial assets and financial liabilities carried at FVTPL are expensed in profit or loss.

###### (b) Classification and subsequent measurement of financial assets

The Bank classified its financial assets into one of the following categories:

- as loans and receivables; or
- at FVTPL, and within this category as:
  - held for trading; or
  - designated at FVTPL.

All financial liabilities were measured at amortised cost.

###### (i) *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are initially recognised at fair value plus any directly attributable transaction costs and measured subsequently at amortised cost using the effective interest method. The Bank determines the appropriate effective interest rate applicable (see Note 4.25). Loans and receivables are subject to expected credit loss (“ECL”) requirements. Interest on financial assets is recognised in profit or loss and is reported as ‘interest income’.

The Bank uses settlement-date accounting for regular way contracts when recording financial asset transactions. Financial assets, consisting of investment securities, that are transferred to a third party but do not qualify for de-recognition remain within investment securities but disclosed as “pledged as collateral”, if the transferee has the right to sell or re-pledge them.

###### (ii) *Financial assets at FVTPL*

FVTPL category comprises of financial assets designated at FVTPL. These are initially recognised at fair value, with transaction costs recognised in profit or loss and subsequently measured at fair value. Interest on financial assets is recognised in profit or loss and is reported as gains arising from fair valuation of financial assets at FVTPL. Dividend income is recognised in profit or loss on the date on which the right to receive payment is established.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.3 Financial instruments (continued)**

(b) Classification and subsequent measurement of financial assets (continued)

(ii) *Financial assets at FVTPL* (continued)

The Bank has applied IFRS Accounting Standards 9 as issued by IASB and classifies its financial assets in the following measurement categories:

- at amortised cost; or
- at FVTPL.

The classification requirements for debt and equity instruments are described below:

*Debt instruments*

Debt instruments are those instruments that meet the definition of a financial liability from the issuer's perspective, such as loans, US Treasury bonds and Government bonds. Classification and subsequent measurement of debt instruments depend on:

- the Bank's business model for managing the asset; and
- the cash flow characteristics of the asset.

*Business model*

The business model reflects how the Bank manages its assets in order to generate cash flows. That is, whether the Bank's objective is solely to collect the contractual cash flows from the assets or is to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e.g., financial assets are held for trading purposes), then the financial assets are classified as part of 'other' business model and measured at FVTPL. Factors considered by the Bank in determining the business model for a group of assets include past experience on how the cash flows for these assets were collected, how the assets' performance is evaluated and how risks are assessed and managed.

*Solely Payments of Principal and Interest ("SPPI") test*

Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Bank assesses whether the financial instruments' cash flows represent solely payments of principal and interest (the "SPPI" test). In making this assessment, the Bank considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that is inconsistent with a basic lending arrangement, the related financial asset is classified and measured at FVTPL.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.3 Financial instruments (continued)****(b) Classification and subsequent measurement of financial assets (continued)****(ii) Financial assets at FVTPL (continued)**

The Bank reclassifies debt instruments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent and none occurred during the year.

Based on these factors, the Bank classifies its debt instruments into one of the following measurement categories:

- *Amortised cost*

Assets that are held for collection of contractual cash flows where those cash flows represent SPPI, and that are not designated at FVTPL, are measured at amortised cost. The carrying amount of these assets is adjusted by any ECL allowance recognised and measured as described in Note 4.3(c). Interest income from these financial assets is included in interest income using the effective interest method.

The amortised cost is the amount at which the financial asset or financial liability is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e., its amortised cost before any impairment allowance) or to the amortised cost of a financial liability. The calculation does not consider expected credit losses and includes transaction costs, premiums or discounts and fees and points paid or received that are integral to the effective interest rate, such as origination fees.

When the Bank revises the estimates of future cash flows, the carrying amount of the respective financial assets or financial liability is adjusted to reflect the new estimate discounted, using the original effective interest rate. Any changes are recognised in profit or loss.

- *FVTPL*

Assets that do not meet the criteria for amortised cost or fair value through other comprehensive income ("FVOCI") are measured at FVTPL. A gain or loss on a debt instrument that is subsequently measured at FVTPL is recognised in profit or loss and presented in profit or loss within gains arising from fair valuation of financial assets at FVTPL in the period in which it arises.

## CENTRAL BANK OF SEYCHELLES

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

#### 4. MATERIAL ACCOUNTING POLICIES (CONTINUED)

##### 4.3 *Financial instruments (continued)*

##### (b) Classification and subsequent measurement of financial assets (continued)

##### (ii) *Financial assets at FVTPL (continued)*

##### - *Equity instruments*

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets.

The Bank subsequently measures all equity instruments at FVTPL. Dividends, when representing a return on such investments, continue to be recognised in profit or loss under 'other income' when the Bank's right to receive payments is established. Gains and losses on equity investments at FVTPL are included in the gains arising from fair valuation of financial assets at FVTPL line in profit or loss.

##### (c) Impairment

Immediately after initial recognition, an ECL allowance is recognised for financial assets measured at amortised cost and investments in debt instruments measured at FVOCI, which results in an accounting loss being recognised in profit or loss. At 31 December 2025, the Bank did not have any financial assets measured at FVOCI (2024 – Nil).

The Bank assesses on a forward-looking basis the ECL associated with its debt instrument assets carried at amortised cost and with the exposure arising from loan commitments.

The Bank recognises a loss allowance for such losses at the end of each reporting period. The measurement of ECL reflects:

- an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and
- reasonable and supportable information that is available without undue cost or effort as at the reporting date about past events, current conditions and forecasts of future economic conditions.

##### (d) Classification and subsequent measurement of financial liabilities

All the financial liabilities are measured at amortised cost under IFRS Accounting Standards 9 as issued by IASB. The Bank recognises all its financial liabilities initially at the value of the consideration received for those liabilities, excluding transaction costs and subsequently measures them at amortised cost.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.3 *Financial instruments (continued)*****(e) De-recognition of financial assets and liabilities**

Financial assets are derecognised when the contractual rights to receive cash flows from these assets have ceased to exist or the assets have been transferred and substantially all the risks and rewards of ownership of the assets are also transferred (that is, if substantially all the risks and rewards of ownership have not been transferred, the Bank tests control to ensure that continuing involvement on the basis of any retained powers of control does not prevent de-recognition). Financial liabilities are derecognised only when the obligation is discharged, cancelled or expired.

**(f) Fair value measurement**

Fair value is the price that would be received to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Bank has access at that date. The fair value of liability reflects its non-performance risk.

When available, the Bank measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Bank uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would consider in pricing a transaction.

The best evidence of the fair value of a financial instrument at initial recognition is normally the transaction price – i.e., the fair value of the consideration given or received. If the Bank determines that the fair value at initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique that uses only data from observable markets, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value at initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.3 Financial instruments (continued)****(f) Fair value measurement (continued)**

The fair value of a demand deposit is not less than the amount payable on demand, discounted from the first date on which the amount could be required to be paid.

The Bank recognises transfers between levels of the fair value hierarchy as of the end of the reporting period during which the change has occurred.

**4.4 Repurchase agreements**

In the course of its financial market operations, the Bank may engage in repurchase agreements involving investment securities.

Securities sold and contracted for repurchase under reverse repurchase agreements (“reverse repos”) remain classified as investment securities and are disclosed as pledged assets, when the transferee has the right by contract or custom to sell or re-pledge the collateral; the counterpart obligation to repurchase the securities is reported in the statement of financial position as part of the Open Market Operations and carried at amortised cost. Securities purchased under agreements to resell (“repos”) are recorded as loans and advances. The difference between the sale and repurchase price is treated as interest and accrued over the term of the agreements using the effective interest method.

**4.5 Balances with International Monetary Fund (“IMF”)****(a) Receivables**

Deposits with the IMF are included in cash and cash equivalents and represent the membership quota of the Seychelles with the IMF. Holdings of Special Drawing Rights (SDR) relates to the amounts with the IMF that are available for day-to-day operations of the Bank.

Reserve tranche position is the extent to which the IMF's holdings of a member's currency are less than the member's quota. This excludes holdings obtained by members through the use of IMF credit. Also excluded are holdings in the IMF number two account that are less than one tenth of one per cent quota. The reserve tranche position is part of the member country's external reserves.

**(b) Liabilities**

Borrowings from the IMF are financial liabilities held by the Bank on behalf of the Government of Seychelles, denominated in XDR and are included under the IMF obligations in the statement of financial position. Borrowings from the general resources of the IMF bear interest at rates set by the IMF weekly and are repayable according to the agreed repayment schedules. The interest rate amounted to **2.66 per cent** per annum as at 31 December 2025 (2024 – 3.16 per cent per annum). All borrowings from the IMF are guaranteed by promissory notes which are issued by the Government and are payable on demand.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.6 Impairment of financial assets**

The Bank assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired.

A financial asset or a group of financial assets is impaired and impairment losses are recognised only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event(s) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The criteria that the Bank uses to determine that there is objective evidence of an impairment loss include:

- a) material financial difficulty of the issuer or obligor;
- b) a breach of contract, such as a default or delinquency in interest or principal payments;
- c) the lender, for economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the lender would not otherwise consider;
- d) it becomes probable that the borrower will enter bankruptcy or another financial reorganisation;
- e) the disappearance of an active market for that financial asset because of financial difficulties;  
or
- f) observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the portfolio, including:
  - adverse changes in the payment status of borrowers in the portfolio; and
  - national or local economic conditions that correlate with defaults on the assets in the portfolio.

If the Bank determines that no objective evidence of impairment exists for an individually assessed financial asset, whether material or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.6 *Impairment of financial assets (continued)***

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred), discounted at the financial asset's original effective interest rate.

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in profit or loss.

If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Bank may measure impairment on the basis of an instrument's fair value using an observable market price.

Impairment charges relating to loans and advances are classified in "impairment charges" in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in profit or loss.

**4.7 *Impairment of non-financial assets***

At each reporting date, the Bank reviews the carrying amounts of its non-financial assets to determine whether there is any indication of impairment. If any such indication exists, then the assets' recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that is largely independent of the cash inflows of other groups of assets.

The 'recoverable amount' of a group of assets is the greater of its value in use and its fair value less costs to sell. 'Value in use' is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the group of assets.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.7 *Impairment of non-financial assets (continued)***

An impairment loss is recognised if the carrying amount of a group of assets exceeds its recoverable amount.

Impairment losses are recognised in profit or loss. They are allocated first to reduce the carrying amount of the assets allocated within the group of assets on a pro-rata basis.

An impairment loss in respect of non-financial assets is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

**4.8 *Offsetting of financial assets and financial liabilities***

Financial assets and financial liabilities are offset and the net amount is presented in the statement of financial position when, and only when, the Bank has a legal right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRS Accounting Standards as issued by IASB or for gains and losses arising from a group of similar transactions.

**4.9 *Cash and cash equivalents***

Cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including foreign currency notes, balances held with banks abroad, holdings of IMF SDR and Reserve tranche with IMF. Cash and cash equivalents are carried at amortised cost in the statement of financial position.

**4.10 *Other balances and placements***

Other balances and placements comprise balances with more than three months' maturity from the date of acquisition, including deposits held with banks abroad. These are initially measured at fair value plus incremental direct transaction costs, and subsequently accounted for at amortised cost.

**4.11 *Financial assets at FVTPL***

Financial assets at FVTPL represents investments in money market funds, securities, equity shares and funds outsourced to fund managers. Additionally, it comprises of other securities issued or guaranteed by the Government purchased in line with Section 41 of the CBS Act, 2004, as amended. These financial assets have been designated at FVTPL with the changes in fair value recognised immediately in profit or loss.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.12 Other assets**

Other assets are made up of cheques held for clearing and settlement after the reporting date, items due but not yet received, IMF charges adjustment receivable, prepaid employee benefits, currency and other prepayments made by the Bank as well as settlement receivables. These are measured at their carrying amounts and are subject to impairment and ECL (see Note 12).

**4.13 Currency replacement costs**

The Bank defers charging the costs of banknote printing and coin minting to profit or loss until the Bank is in receipt of the banknotes and coins. As the asset is then in the location and condition necessary for it to be used in the manner intended by management.

Any portion of production left in storage overseas is accounted as currency prepayments until it is physically received in country. The Bank amortises the expense of received stock over the expected useful life of the currency. Useful lives are currently estimated to be 5 years and this is reviewed on an annual basis. Fully amortised costs of past replacements are treated as disposals and derecognised.

**4.14 Property and equipment****(a) Recognition and measurement**

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Costs include expenditures that are directly attributable to the acquisition of the items. If material parts of an item of property and equipment have different useful lives, then they are accounted for as separate items (major components) of property and equipment. Gains and losses on disposals are determined by comparing proceeds with carrying amount and are recognised in profit or loss.

**(b) Subsequent costs**

Subsequent costs are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. All other repairs and maintenance are charged to profit or loss during the financial year in which they are incurred.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.14 Property and equipment (continued)****(c) Depreciation**

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

Buildings	-	25 – 50 years;
Office furniture and fittings	-	2 – 10 years;
Office machine and equipment	-	4 years;
Motor vehicles	-	5 years.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

**(d) Impairment**

Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

An impairment loss amounting to **SCR 40.8 million** was recognised for property and equipment as at 31 December 2025 (2024 – Nil). The impairment loss was as a result of extensive structural damage discovered in the Bank's main building located in Victoria during exterior renovation works. The extent of the damage led to fungus infestation in certain areas of the building, for which remedial action could be costly and requiring complete evacuation. These findings prompted the Bank's decision to demolish and reconstruct the building. The carrying amount of the building was written down to its recoverable amount, determined by using both the value in use and fair value less costs to sell methods. Both methods confirmed that the recoverable amount was **nil** (2024 - Nil), which was less than the carrying amount of **SCR 40.8 million** (2024 – Nil).

The net carrying amount of the building was determined after deducting the value of the assets to be salvaged for future use. The difference between the recoverable amount and the carrying amount resulted in the impairment loss of **SCR 40.8 million** (2024 – Nil). The total value of salvaged items amounted to **SCR 16.2 million** (2024 – Nil), while accumulated depreciation amounted to **SCR 2.7 million** (2024 – Nil), resulting in a net carrying amount of **SCR 13.5 million** (2024 – Nil).

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.15 Leases****(a) The Bank as lessee**

The Bank assesses whether a contract is or contains a lease, at inception of the contract. The Bank recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Bank recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed. As at 31 December 2025, the Bank has five lease contracts, each with a lease term of 24 months. The Bank's leases primarily relate to alternate office spaces and a storage facility.

**(b) The Bank as lessor**

The Bank enters into lease agreements as a lessor with respect to portions of its buildings. Leases for which the Bank is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease.

**4.16 Intangible assets**

Intangible assets comprise computer software licences which are recognised at cost less accumulated amortisation and any accumulated impairment losses. The computer software has a definite useful life and is amortised using the straight-line method over its useful economic life. Assets are analysed to assess whether their carrying amount is fully recoverable. An impairment loss is recognised if the carrying amount exceeds the recoverable amount.

The Bank chooses to use the cost model for the measurement after recognition. Costs associated with maintaining computer software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Bank are recognised as intangible assets when the following criteria are met:

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.16 *Intangible assets (continued)***

- it is technically feasible to complete the software product so that it will be available for use;
- Management intends to complete the software product and use or sell it;
- there is an ability to use or sell the software product;
- it can be demonstrated how the software product will generate probable future economic benefits;
- adequate technical, financial and other resources to complete the development and to use or sell the software product are available; and
- the expenditure attributable to the software product during its development can be reliably measured.

Directly attributable costs that are capitalised as part of the software product include the software development employee costs and an appropriate portion of relevant overheads.

Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

Computer software development costs recognised as assets are amortised over their estimated useful lives, which do not exceed five years.

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

**4.17 *Currency in circulation***

The Bank is the sole mandated statutory body in Seychelles to issue legal tender currency, in accordance with Section 18 of the CBS Act, 2004 as amended. Currency in circulation represents money released to the public for circulation in the form of banknotes and coins measured at face value. This represents an un-serviced liability of the Bank and is recorded in the statement of financial position.

When banknotes and coins are returned to the Bank by the banks, Seychelles Credit Union ("SCU"), Government entities and the general public, they are removed from currency in circulation. Depending on their condition or legal tender status, they are either sent for destruction or held for re-issue.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.18 Deposits**

Deposits held by the Bank from banks, other financial institutions and the Government, whether SCR or foreign currency deposits are initially measured at fair value and subsequently carried at amortised cost in the statement of financial position. Both SCR and foreign currency deposits are not allowed to be overdrawn and foreign currency deposits are revalued to reflect the market exchange rates as at the reporting date.

**(a) Deposits from banks**

As at the reporting date, banks' demand deposits were earning no interest (see Note 18). These deposits are not normally allowed to be overdrawn. In the event that banks cannot meet the daily settlement of payments and the minimum reserve requirement in SCR, the banks make use of the inter-bank market in the first instance to manage their liquidity positions and to meet their payment and settlement obligations. In the event that they fail to obtain the required funds to manage their liquidity positions and to meet their payment and settlement obligations, they are able to request short-term advances from the Bank through the form of the Standing Credit Facility ("SCF") which is an overnight collateralised lending facility. For more severe and persistent short-term liquidity problems they may access the Emergency Lending Facility ("ELF") provided they have adequate and sufficient collateral. The applicable interest rate on SCF was **3.25 per cent** per annum for the year 2025 (2024 – 3.5 per cent per annum for the first quarter and 3.25 per cent per annum from the second to fourth quarter). The ELF was not used during the year 2025 (2024 – Nil).

**(b) Deposits from Government**

Deposits from the Government, whether SCR or foreign currency, are not normally allowed to be overdrawn (see Note 17). In the event that the Government experiences temporary deficiencies of revenue, the Bank may grant temporary short-term advances in SCR to the Government in accordance with Section 40 of the CBS Act, 2004, as amended.

In order to grant such an advance, the Bank must be satisfied that:

- such advances are consistent with monetary policy;
- subject to an interest rate not lower than the monetary policy rate;
- the total amount of advances does not exceed 10 per cent of the Government's average revenue from the preceding three years;
- advances granted and converted into Government bearer securities, prior to December 2022 shall not be included in the limit on advances and shall be used solely for monetary policy purposes;
- such advances shall be repaid as soon as possible up to a maximum period of six months after the end of the financial year in which they are granted.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.18 Deposits (continued)****(b) Deposits from Government (continued)**

In December 2024, the Board approved a temporary advances limit of **SCR 100.0 million** for the year 2025, provided for under Section 40(1) of the CBS Act, 2004, as amended (2024 – SCR 100.0 million). The applicable interest rate for such an advance is the interest rate equal to the latest average tender rate for the 91-day treasury bill plus a margin of 50 basis points, however, should it fall below the Monetary Policy Rate (MPR), the applicable interest rate shall be equal to the MPR. In 2025, the Government did not access the facility, similar to 2024.

In the event of force majeure and the Government experiences temporary deficiencies of revenue, the Bank may grant temporary short-term advances in SCR to the Government in accordance with Section 40A(1) of the CBS Act, 2004, as amended. In order to grant such an advance, the Bank must be satisfied that such advances:

- are consistent with the primary objective of the Bank, the monetary policy and the established limit on public debt;
- are subject to an interest rate not lower than the monetary policy rate;
- shall be for a period of not more than one year.

In 2025, similar to 2024 the Board did not set a limit on the total temporary advances to be granted for the year under Section 40A(1) of the CBS Act, 2004, as amended as there was no force majeure declared.

Under Section 40B(1) of the CBS Act, 2004, as amended, the Bank may provide credit to Government in SCR from proceeds of SDR allocated to Seychelles under Article XV of the Articles of Agreement of the IMF (see Note 7) and from proceeds of other financial assets received by the Bank, as a result of membership of Seychelles to an international financial organisation.

Section 40B(2) of the CBS Act, 2004, as amended, stipulates that the credit granted under subsection 40B(1) of the CBS Act 2004, as amended shall bear interest not lower than the interest rate or charge payable by the Bank in respect of the SDRs or another financial asset and that the repayment term shall not exceed the maturity date or redemption date of the corresponding financial asset. In 2025, the Government did not access the facility, similar to 2024.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.18 Deposits (continued)****(c) Deposits from other financial institutions**

Deposits held from other financial institutions are SCR demand deposits and are initially measured at fair value and subsequently carried at amortised cost in the statement of financial position. As at the reporting date, these demand deposits from the SCU, the Seychelles Pension Fund ("SPF") and the Development Bank of Seychelles ("DBS") were earning no interest (see Note 19).

These deposits are not normally allowed to be overdrawn, however, in the event of an overdraft on the demand deposit account of SCU only, SCU may request for a temporary short-term advance in the form of the SCF outlined in (a) above.

**(d) Other deposits**

These other deposits comprise mainly of local and foreign currency denominated abandoned properties, unclaimed funds and special (project funds) deposits (see Note 20). Apart from the special (project funds) deposits which earn a fixed interest of 2.0 per cent per annum every six months on the daily balance, all other deposits are non-interest bearing. These deposits are not allowed to be overdrawn and are payable on demand.

**4.19 Other liabilities**

Other liabilities are made up primarily of provisions for employee benefits (gratuities, compensation, termination and post-employment benefits), items due and yet to be paid, cheques issued, income received in advance and other payables.

**4.20 Employee benefits****(a) Short-term employee benefits**

Short-term employee benefits, including salaries, paid vacation leave, paid sick leave, accrued leave, accrued performance costs and non-monetary benefits such as medical care for current employees and their dependents, are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Bank has a present legal or constructive obligation to pay this amount as a result of past services provided by the employee, and the obligation can be estimated reliably.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.20 Employee benefits (continued)****(b) Defined benefit plan – Compensation**

The Bank's defined benefit plan is calculated by estimating the amount of future benefits that employees have earned in the current and prior periods, and this is usually dependent on one or more factors such as age, years of service and compensation rate. As per the Employment Act 1995, as amended, an employee is entitled to compensation upon leaving the services of the Bank. As such, the Bank has to accrue one day's pay for each completed month of service to make provision for these payments when they fall due.

The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of Government bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related pension liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited immediately to other comprehensive income in the actuarial reserve in the case of the defined benefit plan and are charged or credited to profit or loss in the case of other long-term employee benefits. Past service costs are recognised immediately in profit or loss.

**(c) Other long-term employee benefits – Retirement gratuity (Retirement benefit)**

The Bank provides for the payment of retirement benefits to long-serving employees. From 2019, the permanent employees of the Bank on continuous contracts who have accumulated a minimum of 20 years of continuous service are entitled to a retirement benefit upon retirement or resignation. The amount provided for every year is based on the discounted present value of the future obligations attributable to all employees of the Bank except for Key Management personnel, who are not entitled to this benefit.

Both types of employee benefits, compensation and retirement gratuity, have characteristics of a defined benefit plan. The liability recognised in the statement of financial position in respect of the defined benefit plan is the present value of the defined benefit obligation as at the reporting date, less the fair value of plan assets.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.20 *Employee benefits (continued)*****(d) Other long-term employee benefits – End of term gratuity**

The Bank provides for a payment of end of term gratuity to certain Key Management personnel, namely the Governor, First Deputy Governor and Second Deputy Governor, at the end of their contracts. The amount provisioned every year is based on the discounted present value of future obligations attributable to the completed years of service.

**(e) Other post-employment benefits**

The Bank provides for a one-off payment to certain Key Management personnel, namely the Governor, First Deputy Governor, Second Deputy Governor, and Non-Executive Board members upon ceasing to hold office, in view that they are restricted from taking employment, providing consultancy services or being appointed as a director of any institution under the regulatory jurisdiction of the Bank for a period of six months immediately after they cease to hold office in accordance with Section 7 of the CBS Act, 2004, as amended. The amount provisioned every year is based on the discounted present value of this future obligation attributable to the completed years of service.

**(f) Termination benefits**

Termination benefits are payable when employment is terminated by the Bank before the normal retirement age, or whenever an employee accepts voluntary redundancy in exchange for these benefits.

**(g) Defined contribution plan**

A defined contribution plan is a pension plan under which the Bank pays fixed contributions into a separate entity. The Bank pays contributions to the SPF on a mandatory and voluntary basis. The contributions made are recognised under salaries and allowances.

The Bank has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient amount to pay all employees the benefits relating to employee service in the current and prior period. The Bank contributes towards one defined contribution plan. This contribution goes to the SPF in accordance with the Seychelles Pension Fund Act. Payments to SPF are charged as an expense as they fall due.

Prepaid contributions are recognised as an asset to the extent that a cash refund or reduction in future payments is available.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.21 Provisions**

Provisions for legal claims are recognised when:

- the Bank has a present legal or constructive obligation as a result of past events;
- it is probable that an outflow of resources will be required to settle the obligation; and
- the amount has been reliably estimated.

Provisions are not recognised for future operating losses. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation based on the current market assessment of the time value of money and risks specific to the obligation.

**4.22 Authorised capital and General reserve**

The statutory capital (which comprises the Authorised capital and the General reserve) of the Bank was established by the CBS Act, 2004, as amended. The Bank maintains the General reserve to provide for events which are contingent and non-foreseeable, that cannot be absorbed by its other resources.

In accordance with the amendments to Section 14 of the CBS Act, 2004, as amended, the authorised capital of the Bank shall be an amount equivalent to SCR 550.0 million, which the Government shall build up over a period of ten years starting as at 1 January 2024. The Authorised capital shall not be reduced at any time, shall be reviewed at least every ten years and may be increased by such amounts proposed by the Bank and approved by the Government. All capital stock of the Bank, as and when issued, shall be for the sole account of the Government and shall not be transferable or subject to encumbrances. As per the CBS Act, 2004, as amended, all Authorised capital shall be deemed to be fully paid up.

**4.23 Revaluation reserve**

The Bank also holds Revaluation Reserve Accounts. These comprise unrealised gains and losses arising from changes in the revaluation of the Bank's assets and liabilities including financial assets held at FVTPL denominated in foreign currencies. This is as a result of alterations of parity of the SCR which are credited or charged to profit or loss and are subsequently transferred to the Revaluation Reserve Account, in accordance with Sections 45(5) and 45(6) of the CBS Act, 2004, as amended.

**4.24 Actuarial reserve**

The Bank holds an actuarial reserve in which cumulative actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are transferred.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.25 *Interest income and expense***

Interest income and interest expense are recognised in profit or loss for all financial instruments measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instruments to the net carrying amount of these instruments.

When calculating the effective interest rate, the Bank estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or group of similar financial assets have been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

**4.26 *Fees and commission income***

Fees and commissions are generally recognised in profit or loss on an accrual basis when the service has been provided. Commission on foreign exchange dealings is recognised on the date of transaction. Commission income is derived from charges on foreign currency transactions processed on behalf of the Government and is based on the difference between the Bank's reference rate and the buying or selling rate.

Fees are comprised of new licence application processing fees and annual licence fees, charged by the Bank to financial institutions, Bureaux de Change or payment services providers for the right to operate in Seychelles. All fees are recognised on an accrual basis and annual licence fees are payable in advance on an annual basis. The performance obligation of the Bank arises from fulfilling its supervisory functions under the Financial Institution Act, 2004 as amended and the National Payment System Act, 2014.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.27 *International Monetary Fund (“IMF”) charges***

Charges incurred for IMF membership and on the facilities from the IMF are recognised in profit or loss on an accrual basis for the period in which the charges relate. These are payable shortly after the end of the IMF’s financial quarter. The charges (see Note 36) include:

- *Charges on Special Drawing Rights (SDR) allocation*

SDR allocations are subject to interest charges on the country’s net cumulative allocation. The charges are based on the weighted average of interest rates on short-term financial instruments in the markets of the currencies included in the SDR basket.

- *General Resources Account (GRA) charges*

The GRA charges are computed by the IMF on the basis of the daily GRA outstanding credit balance.

- *Assessment charges*

SDR allocation is subject to an annual assessment to reimburse the IMF for expenses incurred in operating the SDR department. Assessment charges are calculated as a percentage of the net cumulative allocation and are incurred on an annual basis in April.

**4.28 *Policy costs***

Policy expenses are incurred on foreign currency dealings relating to policy decisions vis-à-vis purchases and sales as part of the foreign reserves management activities. These costs are recognised in profit or loss on the dates of the transactions.

**4.29 *Administrative expenses***

The costs of maintaining the premises, motor vehicles and equipment and providing support services to the Bank are recognised in profit or loss on an accrual basis for the period in which the expenses relate.

**4.30 *Other operating expenses***

The costs related to utilisation of digital technologies, maintenance of equipment, fees, contributions, and subscriptions to services, required for the Bank’s daily operations as well as the Guy Morel High Achievement Scholarship amongst others which are recognised in profit or loss on an accrual basis for the period in which the expenses relate.

**4.31 *Gains and losses from financial assets at FVTPL***

Net gain or loss from financial assets at FVTPL includes all realised and unrealised fair value changes on securities sold and foreign exchange differences. Net realised gain or loss from financial assets at FVTPL is calculated using the average cost method.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****4. MATERIAL ACCOUNTING POLICIES (CONTINUED)****4.32 *Distributable earnings***

In accordance to the amendments in Section 16(3) of the CBS Act, 2004, as amended, the Bank is required to transfer any residual of its distributable earnings to the Government Consolidated Fund, after the distribution in subsection (2), on the basis described in Note 6 of the financial statements.

**5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS**

The Bank's financial statement and its financial results are influenced by accounting policies, assumptions, estimates and Management's judgement, which necessarily have to be made in the course of preparing the financial statements.

The Bank makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. All estimates and assumptions are required to be in conformity with IFRS Accounting Standards as issued by IASB and are based on the Management's best estimates in accordance with the applicable standards. Estimates and judgements are evaluated on a continuous basis and are based on past experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

**5.1 *Measurement of the ECL allowance***

The following estimates were made by Management:

The measurement of the ECL allowance for financial assets measured at amortised cost is an area that requires the use of complex models and material assumptions about future economic conditions and credit behaviour (e.g., the likelihood of default and the resulting losses).

A number of material judgements are also required in applying the accounting requirements for measuring ECL, such as:

- Determining criteria for material increase in credit risk;
- Choosing appropriate models and assumptions for the measurement of ECL;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product and the associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.

Explanation of the inputs, assumptions and estimation techniques used in measuring ECL along with information about the judgements and estimates made by the Bank in the above areas is further detailed in Note 46, which also sets out key sensitivities of the ECL to changes in these elements.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONTINUED)****5.2 *Employee benefits***

The present value of the employee benefits, consisting of compensation and retirement gratuity (retirement benefit), depends on a number of factors that are determined on an actuarial basis using several assumptions. Any changes in these assumptions will impact the carrying amount of the employee benefit obligations.

The assumptions used in determining the net cost or income for employee benefits include the life expectancy, discount rate, inflation and salary expectations. The Bank determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the employee benefit obligations.

In determining the appropriate discount rate, the Bank considers the interest rates of Government bonds or its equivalent that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related liability.

**5.3 *Termination and post-employment benefits***

The present value of both termination and post-employment benefits depends on the assumption of an appropriate discount rate. The Bank determines the appropriate discount rate at the date of making the provision.

This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the termination benefit obligations. In determining the appropriate discount rate, the Bank considers the interest rates of Government bonds or their equivalent that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related liability.

The Bank also considers the expected rate of increase in remuneration, and this is estimated from the expected rate of inflation.

Explanation of the inputs, assumptions and estimation techniques used in measuring ECL, along with information about the judgements and estimates made by the Bank in the above areas, is further detailed in Note 46, which also sets out key sensitivities of the ECL to changes in these elements.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONTINUED)****5.3 Termination and post-employment benefits (continued)**

Other key assumptions for the employee benefits obligations are based on current market conditions.

The carrying amount of the defined benefit obligations at 31 December 2025 is **SCR 38.7 million** (2024 – SCR 37.1 million). Details of the defined benefit obligation are disclosed in Note 22(a).

The financial assumptions used for purposes of these calculations are as follows:

- Discount rate: **4.75 per cent** per annum (2024 – 4.50 per cent per annum)
- Salary increase rate: **2.90 per cent** per annum (2024 – 7.0 per cent per annum for the year 2025 and 3.30 per cent per annum for the subsequent years)

It has been assumed that all employees will opt for retirement upon reaching the age of **63** (2024 – 65 years).

No allowance has been made for withdrawal from service or pre-retirement mortality as the benefits payable in such circumstances are not material and the turnover ratio for cases other than death, retirement or dismissal is low.

**5.4 Determination of fair value**

Information about assumptions and estimation uncertainties relating to the determination of fair value of financial instruments is included in Note 47.

**5.5 Impairment of non-financial assets**

The annual impairment assessment has been conducted purely on the internal assumptions and in conjunction with the applicable IFRS accounting standard as issued by IASB. Inputs, assumptions and estimation techniques used is further detailed in Note 4.7 and 4.14 (d).

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***6. TRANSFER TO GOVERNMENT CONSOLIDATED FUND**

Where the Bank has distributable earnings for any financial year, 100 per cent of those earnings shall be distributed to the General reserve until the statutory capital reaches 10 per cent of monetary liabilities. Provided that any residual distributable earnings remaining after a distribution as mentioned above shall be transferred to the Government Consolidated Fund.

Where the distributable earnings of the Bank is less than zero, they shall be offset against the General reserve.

In accordance with Section 16(3) of the CBS Act, 2004, as amended, transfer to the Government Consolidated Fund in 2025 was **nil** (2024 – Nil).

Movements during the year are as follows:

	<b>2025</b>	2024
	<b>SCR' 000</b>	SCR' 000

	-----	-----
<b>At 31 December</b>	<b>-</b>	<b>-</b>
	=====	=====

Section 16 of the CBS Act, 2004, as amended, requires that the distributable earnings of the Bank be calculated as follows:

- a) net profit, less an amount equal to the total amount of unrealised gains, included in the net profit; and
- b) by adding to the amount remaining after applying paragraph (a), the total amount of unrealised gains, if those unrealised gains, included in the net profit of a previous year, are realised; and
- c) by the retention of the unrealised revaluation losses to the extent that they exceed any balance in the relevant Revaluation Reserve Account.

FOR THE YEAR ENDED 31 DECEMBER 2025****9. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS (CONTINUED)****9.1 *Financial assets at fair value through profit or loss – domestic securities buybacks (continued)***

The domestic securities buybacks comprise purchases (“buyback”) of Government securities (treasury bills and treasury bonds) as well as other Government-guaranteed securities, made by the Bank between June 2020 and July 2022 under Section 41(3) of the CBS Act, to facilitate investors who wished to liquidate their investments due to tight liquidity conditions during the COVID-19 pandemic.

During the year 2025, the Bank’s holdings of bonds had a maturity period ranging from **5 years** to **7 years** at coupon rates ranging from **4.50 per cent** to **10.0 per cent** per annum (2024 – 4.50 per cent to 10.0 per cent per annum). In addition, the Bank’s holdings of Government-guaranteed bonds during 2025 had a maturity period of **5 years** at coupon rates of **5.0 per cent** per annum (2024 – 5.0 per cent per annum). All Government-guaranteed bonds matured during 2025.

**9.2 *Financial assets at fair value through profit or loss – fund managers’ investments***

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****11. LOANS AND ADVANCES (CONTINUED)**

The Bank grants loans to its employees at preferential rates. The Bank holds outstanding balances for the facilities granted to the banks and DBS under the private sector relief credit line schemes extended in accordance with the now repealed Section 29A(2) of the CBS Act, 2004, as amended in the form of the Private Sector Relief Credit Line Facility (“PSRCLF”) for MSMEs and the Private Sector (Large Enterprise) Relief Credit Line Facility (“PSLERCLF”) at zero per cent interest. Despite Section 29(A) of the CBS Act, 2004, as amended being repealed, Section 29(A)(2) provides that “any loans, advances or rediscounts issued in accordance with Section 29(A) immediately prior to the effective date of the Central Bank of Seychelles (Amendment) Act, 2004, shall continue to be valid under the same terms and conditions”. The facilities’ maturity date is up to 8 years from the date of disbursement.

Seychelles Electronic Funds Transfer ("SEFT") is a domestic currency denominated electronic funds transfer system operated and used by the Bank which facilitates funds transfers between all banks and SCU. The Electronic Cheque Clearing ("ECC") is a domestic currency denominated electronic cheque clearing system operated and used by the Bank which facilitates same day cheque clearing and electronic cheque image exchange between all banks and SCU.

IMF charges receivable, **SCR 14.3 million** (2024 – SCR 13.6 million) represents funds due from the Government in respect of IMF charges on the third and fourth Extended Fund Facility ("EFF") and the Resilience and Sustainability Facility ("RSF"). This is in line with the Memorandum of Understanding (MoU) that was signed between the Bank and the Government in August 2020, October 2021, October 2023 and November 2023 (see Note 23).

Deposits from Government are denominated in both local and foreign currencies. Government rupee deposits and Government foreign exchange deposits (project accounts) represent amounts denominated in local and foreign currency, respectively, held by the Bank on behalf of the Government and Government related entities.

Government rupee deposits are for operational purposes whilst Government foreign exchange deposits (project accounts) are for specific local projects to be undertaken by the Government. These deposits are non-interest bearing.

	<b>=====</b>	<b>=====</b>

**18.1 Demand deposits**

Banks hold demand deposit accounts with the Bank to facilitate settlement of inter-bank transactions. Furthermore, as per regulations issued under the CBS Act, 2004, as amended, they are required to maintain a minimum statutory reserve amount which is adjusted on the basis of the monetary policy stance as approved by the Board of Directors. In 2025, the minimum statutory reserves requirement was maintained at **13.0 per cent** from the first to third quarter and **10.0 per cent** for the fourth quarter (2024 – 13.0 per cent) on each bank's customers' Rupee deposits (held as demand, savings and time deposits held by residents, excluding inter-bank deposits). The remuneration on the total minimum statutory reserves remained at **zero per cent** (2024 – zero per cent).

**18.2 Foreign currency Minimum Reserve Requirement**

All banks are required to maintain a minimum level of statutory reserves of their foreign currency by way of minimum deposits with the Bank. In 2025 the minimum deposit was maintained at **13.0 per cent** (2024 – 13.0 per cent) on each bank's customers' foreign currency deposits (held as demand, savings and time deposits held by residents excluding foreign currency deposits held by non-residents). Since its introduction in April 2009 up to the end of 2025, the Bank has not paid any interest on foreign currency minimum statutory reserves requirement.

**18.3 Standing Deposit Facility**

All banks and SCU can place their excess funds into overnight deposits with the Bank for remuneration, upon request, at a predetermined rate which is set by the Bank. This facility has been offered by the Bank since August 2014. As of June 2017, the interest rate corridor mechanism was adopted, whereby the Board of Directors also approves the interest rates applicable to the Standing Deposit Facility ("SDF") that is consistent with the Bank's monetary policy stance. The applicable interest rate on SDF was **0.25 per cent** per annum for the year 2025 (2024 – 0.5 per cent per annum for the first quarter and 0.25 per cent per annum from the second to fourth quarter).

	=====	=====

Other financial institutions hold demand deposit accounts with the Bank to facilitate external transactions. These deposits are non-interest-bearing and repayable on demand. SCU which forms part of other financial institutions is also required by the Bank to maintain minimum statutory reserves requirement at **13.0 per cent** from the first to third quarter and **10.0 per cent** for the fourth quarter (2024 – 13.0 per cent), similar to banks (see Note 18.1).

	=====	=====

As per the Financial Institutions Act, 2004, as amended ("FIA"), banks are required to publish and report to the Bank abandoned accounts or other properties, namely contents of safe deposit boxes, for which no transaction has been made for at least 10 years. In the 11<sup>th</sup> year, abandoned properties are transferred to the Bank. Funds transferred to the Bank are maintained in non-interest-bearing accounts whilst contents of safe deposit boxes are kept in the Bank's vault. These abandoned properties are refundable to the clients on demand.

Section 8(1) of Schedule 5 of the FIA, 2004, as amended, states that unclaimed funds which are not subject to other provisions of FIA shall, on the direction of the Bank, be transferred to a special account with the Bank.

	=====	=====

*(a) Deposit Auction Arrangement*

The Deposit Auction Arrangement (“DAA”) is a liquidity management tool used by the Bank for Open Market Operations. It is made available by the Bank to the banks and SCU for better liquidity management by both parties. The Bank uses the instrument to mop up excess liquidity in the system, whilst the banks and SCU use it as a means for them to invest their excess reserves and earn a return. The maturities offered were for **five, seven, twenty-eight, thirty-five, fifty-six, sixty-three and three hundred and sixty-four days** in 2025 (2024 – six, seven, twenty-eight, thirty-four, thirty-five, fifty-six, sixty-two, sixty-three and three hundred and sixty-four days).

Banks and SCU are called to state the amount of funds they would like to bid and their respective bid interest rates in any of the maturities on offer. Each maturity on offer is set by the Bank, and it is up to the Bank to decide whether to accept or reject any bid.

As at the reporting date, an amount of **SCR 2,690.65 million** was held by the Bank (2024 – SCR 1,534.54 million).

*(b) Reverse Repurchase Agreement*

The pledged Reverse Repurchase Agreement (RRA) is a monetary policy instrument used by the Bank for withdrawal of liquidity. The Bank pledges securities to Other Depository Corporations (ODCs) at a specific price, with an understanding to return the withdrawn liquidity at a specific future date and price, under a formal legal Agreement.

As at the reporting date, the amount held by the Bank was **nil** (2024 – Nil).

The Bank does not have any plan assets as the employee benefit relates to unfunded obligations in relation to compensation and gratuities.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****22. OTHER LIABILITIES (CONTINUED)****(a) Employee Benefit Obligations (continued)****Compensation plan**

All employees of the Bank, except for Key Management personnel, are entitled to compensation for their years of continuous service at retirement or upon leaving the services of the Bank. Provision for this compensation cost is made on an annual basis for every year completed by the employee and payments are made immediately after the last day of service. The Bank has recognised a net liability of **SCR 28.9 million** for this compensation plan as at 31 December 2025 (2024 – SCR 27.0 million).

**Retirement gratuity plan (Retirement benefit plan)**

The Bank provides for a payment of ex-gratia retirement benefit to permanent employees reaching a minimum of 20 years of continuous service upon retirement or resignation. The Bank has recognised a net liability of **SCR 9.8 million** for this retirement gratuity plan (retirement benefit plan) as at 31 December 2025 (2024 – SCR 10.0 million).

**Funding**

The Bank provides for the compensation and retirement gratuity costs for its permanent employees on an accrual basis and expenses the accrued amount in the financial year in which the service is rendered.

**Duration**

At 31 December 2025, the weighted-average duration of the defined benefit obligation was **18 years** for both the compensation and retirement benefit plan (2024 – 21 years for both the compensation plan and retirement benefit plan).

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****22. OTHER LIABILITIES (CONTINUED)****(b) Sensitivity analysis**

Possible reasonable changes as at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below:

	Compensation plan		Retirement gratuity plan	
	Increase SCR' 000	Decrease SCR' 000	Increase SCR' 000	Decrease SCR' 000
<b>2025</b>				
Discount rate (1.0% increase)	-	4,410	-	1,447
Discount rate (1.0% decrease)	5,532	-	1,810	-
<b>2024</b>				
Discount rate (1.0% increase)	-	4,804	-	1,742
Discount rate (1.0% decrease)	6,158	-	2,229	-

Although the analysis does not take into account the full distribution of cash flows expected under the plans, it does provide an approximation of the sensitivity of the assumptions shown.

The sensitivity analysis has been carried out by recalculating the present value of obligations at the end of each period after increasing or decreasing the discount rate while leaving all other assumptions unchanged. Any similar variation in the other assumptions would have shown smaller variations in the defined benefit obligation.

**(c) Onerous Contracts**

The Bank terminated a lease contract for office space in November 2025 which resulted in the recognition of a net liability of **SCR 8.29 million** as at 31 December 2025 (2024 – Nil).

	=====	=====

Seychelles became a member of the IMF on 30 June 1977 and was initially assigned a quota of XDR 1.0 million. The quota allocation determines the financial and organisational relation with the IMF. Subsequent increases in quota subscription were effected over the years which have brought the quota subscription to **XDR 22.9 million** as at reporting date (2024 – XDR 22.9 million). The portion payable in SCR is paid by way of non-negotiable, non-interest-bearing promissory notes issued by the Government in favour of the IMF, are payable on demand. These promissory notes are lodged with the Bank acting as custodian for the IMF.

In August 2021, the IMF approved a general allocation of Special Drawing Rights (SDR Allocation) to boost the global economy of all its members. Seychelles was allocated an additional XDR 21.9 million in proportion to its existing quota of funds. As at 31 December 2025, SDR Allocation stood at **XDR 30.2 million** (2024 – XDR 30.2 million).

In May 2020 and July 2021, the IMF approved financial assistance for Seychelles under the RFI and EFF, respectively, both for Government budget support. Respective MoUs were signed in August 2020 and October 2021 between the Government and the Bank to establish the framework for the modalities for the repayment and the servicing of interest and other charges. These MoUs shall remain in force until all repayments related to the RFI and EFF disbursements, charges, fees, and interest payments have been made in full to the IMF.

In May 2020, the Government's request for emergency funding under the RFI amounting to XDR 22.9 million (equivalent to 100 per cent of quota) was approved. The funds received were used primarily to provide budget support to the Government as a result of the negative impact of the COVID-19 pandemic on the economy.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****23. INTERNATIONAL MONETARY FUND OBLIGATIONS (CONTINUED)**

In June 2017, the Government successfully completed a three-year EFF, which was the second EFF program that the Seychelles had with the IMF under its reform initiatives. As at 31 December 2025, the outstanding repurchase stood at **XDR 1.2 million** (2024 – XDR 2.5 million).

In July 2021, the Government's request for a third EFF was approved for XDR 74.0 million (equivalent to 323.0 per cent of quota). This was for the purpose of Government budget support and governed by the terms of the MoU signed between the Government and the Bank in October 2021. As at 31 December 2025, total disbursement under the third EFF was **XDR 61.0 million** (2024 – XDR 61.0 million).

In May 2023, the Government's request for two new facilities; a three-year arrangement under a fourth EFF for XDR 43.4 million (equivalent to 185.0 per cent of quota) to replace the one approved in July 2021 and a three-year arrangement under the Resilience and Sustainability Facility (RSF) for XDR 34.4 million (equivalent to 150.0 per cent of quota) was approved. The fourth EFF was for budget financing needs, and the RSF was to strengthen resilience to climate change. The facilities are governed by the terms of two MoUs between the Government and the Bank signed in October 2023 for the EFF, and in November 2023 for the RSF. As at 31 December 2025, total disbursements under the fourth EFF were **XDR 30.5 million** (2024 – XDR 24.4 million) and under the RSF were **XDR 13.3 million** (2024 – XDR 9.4 million).

The Bank, as fiscal agent to the Government, continues to maintain the following balance sheet accounts with the IMF under the heading IMF Obligations: IMF Purchases Outstanding account for the first and second EFF, SDR Allocation account, IMF no.1 account and IMF no. 2 account. Other balance sheet accounts classified under cash and cash equivalents include SDR Holdings account and Reserve Tranche account, both denominated in XDR. SDR Allocations are subject to charges while SDR holdings earn interest on a quarterly basis. Total repayments made throughout the year 2025 under the first and second EFF amounted to **XDR 1.2 million** (2024 – XDR 1.8 million).

The Bank holds off balance sheet records, in order to report the account movements and balances to the IMF on behalf of the Government, for the IMF Securities account backed by Government issued promissory notes amounting to **SCR 2,212.6 million** as at the reporting date (2024 – SCR 2,134.7 million). Other off balance sheet records include the IMF Purchases Outstanding account for the RFI which was **nil** (2024 – XDR 5.7 million), the third EFF amounting to **XDR 61.0 million** (2024 – XDR 61.0 million), the fourth EFF amounting to **XDR 30.5 million** (2024 – XDR 24.4 million) and the IMF Purchases Outstanding account for RSF amounting to **XDR 13.3 million** (2024 – XDR 9.4 million). Total repayments made throughout the year 2025 under the third and fourth EFF was **nil** (2024 – Nil), under RSF was **nil** (2024 – Nil) and amounted to **XDR 5.7 million** (2024 – XDR 11.5 million) under RFI.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***23. INTERNATIONAL MONETARY FUND OBLIGATIONS (CONTINUED)**

The Bank revalues the IMF accounts in its statement of financial position in accordance with the practices of the IMF's Treasury Department. In general, the revaluation is effected annually on 30 April and whenever the IMF makes use of SCR in accordance with the IMF designated plan. For accounting purposes, the IMF accounts have been revalued using exchange rates as at the reporting date.

**24. STATUTORY CAPITAL**

	<b>2025</b>	2024
	<b>SCR' 000</b>	SCR' 000
Authorised capital	<b>231,222</b>	231,222
General reserve	<b>370,110</b>	275,585
	-----	-----
	<b>601,332</b>	506,807
	=====	=====

As per Section 14 of the CBS Act, 2004, as amended, the Authorised capital of the Bank shall be an amount equivalent to SCR 550.0 million (see Note 4.22). The Government shall build up the Authorised capital of the Bank over a period of ten years starting as at 01 January 2024. The MOU between the Bank and the Ministry of Finance is yet to be finalised. Consequently, as at the reporting date, **no transfer** was made by the Government to build up the Authorised capital.

As per Section 16 of the CBS Act, 2004, as amended, where the Bank has distributable earnings for any financial year, 100.0 per cent of those earnings shall be distributed to General Reserve until it reaches 10.0 per cent of monetary liabilities (see Note 6). As at the reporting date, the General reserve stood at **3.68 per cent** (2024 – 3.42 per cent) and the statutory capital of the Bank stood at **5.98 per cent** of total monetary liabilities (2024 – 6.29 per cent).

Where the General reserve accumulates a balance of less than zero, the Bank shall, within a period of not more than 30 calendar days of publication of the annual accounts, prepare a report detailing the causes and extent of the shortfall. The Bank shall request a capital contribution from the Government to remedy the deficit with a prospect of restoring the General Reserve to at least zero. The Government shall within 90 calendar days of the receipt of the request, recapitalise the Bank by transferring the required amount in currency or negotiable debt instruments with a specified maturity issued at prevailing market interest rates. For the year 2025, **no recapitalisation** was required (2024 - no recapitalisation was required).

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****25. REVALUATION RESERVE**

Unrealised gains and losses arise from changes in the valuation of the Bank's assets and liabilities denominated in foreign currencies and other units of account as a result of alterations of parity of the Seychelles Rupee. Unrealised gains and losses also arise in financial assets at FVTPL as a result of fluctuations in market prices. These gains and losses have been credited or charged to profit or loss and subsequently transferred to the Revaluation Reserve Account in accordance with Sections 45(5) and 45(6) of the CBS Act, 2004, as amended. They do not form part of distributable earnings and are offset against the Revaluation Reserve Account.

The net gain from the revaluation of foreign currency denominated monetary assets and liabilities was **SCR 267.21 million** in 2025. Additionally, a net gain of **SCR 436.7 million** on fair valuation of financial assets at FVTPL was recorded. The revaluation and fair valuation gains and losses were transferred to the revaluation reserve account resulting in a total revaluation reserve of **SCR 1,316.8 million** as at the reporting date (2024 – SCR 1,049.0 million).

**26. ACTUARIAL RESERVE**

In line with IAS 19 (Revised), the actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited immediately to other comprehensive income and the accumulated gains and losses form part of the Actuarial reserve. Actuarial gains and losses do not form part of distributable earnings and are accumulated in Actuarial reserve. The total Actuarial reserve for the year 2025 amounts to negative **SCR 8.50 million** (2024 – negative SCR 10.5 million).

All banks and SCU are participants of the local payment systems - ECC and SEFT. Participants' annual contributions are based on their previous year's average usage. For the past four years, contributions were made for using the ECC system only. From March 2020 to December 2025 the Bank absorbed the SEFT system costs to encourage the development and more usage of digital payment platforms whilst the SEFT participants agreed to waive the transfer fees and charges related to their customers' SEFT payments.

Policy costs pertain to losses incurred by the Bank due to the difference between the Bank's foreign exchange mid-rates on transaction value date and the participant's accepted Foreign Exchange Auction ("FEA") exchange bid or offer rates. FEA is a policy instrument used in the domestic foreign exchange market for the purchase and sale of foreign currency as part of the Bank's monetary and foreign operations, for liquidity management purposes, accumulation of foreign exchange reserves and ensuring orderly market conduct. The purchase and sale of foreign currency through FEAs will be at the individual participant's accepted bid or offer exchange rates or at a fixed price as determined by the Monetary Policy Technical Committee ("MPTC").

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****44. RELATED PARTY TRANSACTIONS**

The Bank, in its capacity as fiscal agent to the Government raises domestic debt, executes auctions, carries out back office operations, promotes financial education and the development of financial markets and works towards improving trading and settlement infrastructure.

In the normal course of its operations, the Bank enters into transactions with related parties. Related parties include Government and Key Management personnel, consisting of members of the Board of Directors. Unless stated, all transactions with related parties take place at arm's length.

As banker to the Government, the following are transactions entered into:

- Banking services,
- Foreign exchange transactions,
- Payment and settlement facility,
- Investment in Government Securities, and
- Agent to the Government in raising domestic debt.

Material transactions with the Government are as follows:

**44.1 Foreign exchange transactions**

	<b>2025</b>	2024
	<b>SCR' 000</b>	SCR' 000
Purchase of foreign currency	<b>1,490,045</b>	2,645,956

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****44. RELATED PARTY TRANSACTIONS (CONTINUED)****44.2 Investment in government securities (continued)**

The Bank's holdings of Government securities are derived from the monetisation of past advances to the Government in 2008 (SCR 997.1 million) into treasury bills and the treasury bills issued to recapitalise the Bank in 2010 (SCR 188.0 million). An MoU was signed between the Government and the Bank in 2011 in regards to the long-term Government debt held by the Bank which was converted to Government treasury bills with automatic roll-over at maturity at above-market rates, that is the weighted average interest rate of the most recent treasury bills auction of the same maturity plus 50 basis points (see Note 10).

Other transactions with the Government consist of receipts and payments in SCR made on behalf of the Government.

Outstanding balances from the Government consist of investment securities whilst outstanding balances to the Government consist of deposits from Government as disclosed in the financial statements and corresponding notes.

**44.3 Domestic securities issuance and buybacks****(a) Domestic securities buybacks**

In 2021, the Bank established a buyback facility to purchase securities such as treasury bills and treasury bonds, issued or guaranteed by the Government as permissible under Section 41(3) of the CBS Act, 2004 as amended. In July 2022, the Bank closed access to the facility in line with its unwinding strategy of the COVID-19 policy and measures.

In accordance with the requirements of IFRS Accounting Standards 9 as issued by IASB, the securities purchased under the buyback facility have been accounted as financial assets at FVTPL considering that the objective and the business model for these purchases are that they would be available-for-sale rather than be solely held-to-maturity for the purpose of collecting contractual cash flows.

	<b>2025</b>	2024

	-----	-----
<b>Total Government treasury bonds and Government guaranteed bonds buybacks at FVTPL</b>	<b>1,175</b>	4,902
	=====	=====

The Bank accounted for fair value gains and losses arising from domestic securities buyback transactions in profit and loss.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****44. RELATED PARTY TRANSACTIONS (CONTINUED)****44.3 Domestic securities issuance and buybacks (continued)****(b) Domestic securities issuance – Government treasury bonds**

In 2025, the Bank managed the issuance of **four** treasury bonds (2024 – six treasury bonds) on behalf of the Government for fiscal purposes as detailed below.

<b>2025</b>			
<b>Auction month</b>	<b>Treasury bonds term</b>	<b>Coupon rate p.a. (%)</b>	<b>Issuance limits (SCR million)</b>
March	<b>7-year</b>	<b>5.60</b>	<b>100.0</b>
June	<b>7-year</b>	<b>4.60</b>	<b>100.0</b>
September	<b>7-year</b>	<b>4.60</b>	<b>150.0</b>
November	<b>7-year</b>	<b>4.75</b>	<b>200.0</b>
<b>2024</b>			
<b>Auction month</b>	<b>Treasury bonds term</b>	<b>Coupon rate p.a. (%)</b>	<b>Issuance limits (SCR million)</b>
March	5-year	5.00	85.0
June	3-year	3.50	100.0
	5-year	4.70	100.0
September	5-year	4.50	100.0
	7-year	5.50	100.0
December	5-year	4.50	200.0

The coupon payment terms for the treasury bonds were semi-annual and the treasury bonds were issued through auctions comprising of competitive and non-competitive biddings. The competitive biddings were available to all banks and SCU, the SPF and domestic insurance companies. Non-competitive biddings were available to all other eligible investors.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****44. RELATED PARTY TRANSACTIONS (CONTINUED)****44.3 Domestic securities issuance and buybacks (continued)**

## (c) Domestic securities issuance – Government treasury bills

The Bank issues treasury bills, on behalf of the Government for fiscal purposes. During 2025, the maturities offered were for ninety-one (91), one hundred and eighty-two (182) and three hundred and sixty-five (365) days as detailed below.

Duration (Days)	2025		2024	
	Total auction volume (SCR million)	Average tender price (SCR)	Total auction volume (SCR million)	Average tender price (SCR)
91	227.0	99.37 to 99.48	340.0	98.48 to 99.50
182	453.0	98.69 to 98.88	680.0	98.13 to 98.95
365	455.0	97.33 to 97.70	680.0	96.20 to 97.84

The treasury bills were issued through multiple price auctions whereby bids were allotted competitively and successful bidders were awarded their respective bid prices.

**44.4 Deposits from Government - Central Bank of Seychelles blocked foreign exchange deposits**

	2025 SCR' 000	2024 SCR' 000
Central Bank of Seychelles blocked foreign exchange Deposits (GBP)	89	60
Central Bank of Seychelles blocked foreign exchange Deposits (USD)	1,412	2,240
Central Bank of Seychelles blocked foreign exchange Deposits (EUR)	7,147	6,133
<b>Total blocked foreign exchange deposits (see Note 17)</b>	<b>8,648</b>	<b>8,433</b>

The blocked foreign exchange deposits relate to unidentified Government foreign exchange denominated funds received by the Bank in the three main currencies, namely GBP, USD and EUR. The deposits are non-interest bearing and are placed in these blocked deposit accounts pending such time that information is received as to the correct Government accounts into which the proceeds are credited.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
FOR THE YEAR ENDED 31 DECEMBER 2025**44. RELATED PARTY TRANSACTIONS (CONTINUED)****44.5 Key management personnel**

Key Management personnel comprise the Governor, First Deputy Governor, Second Deputy Governor and the Non-Executive Board members. The latter are considered to be part of the Key Management personnel as they have the authority and responsibility for planning, directing and controlling the activities of the Bank.

The aggregate remuneration provided for and paid to Key Management personnel comprised:

	<b>2025</b>	2024
	<b>SCR' 000</b>	SCR' 000
Salary and allowances	<b>5,211</b>	4,716
Gratuity costs	<b>2,648</b>	2,163
Car benefits	<b>183</b>	112
Post-employment benefits	<b>3,316</b>	2,069
Others	<b>1,366</b>	1,006
	-----	-----
<b>Total</b>	<b>12,724</b>	10,066
	=====	=====

Movements in loans to Key Management personnel were as follows:

	<b>2025</b>	2024
	<b>SCR' 000</b>	SCR' 000
At 1 January	<b>1,251</b>	-
Transfer	-	1,344
Total repayments	<b>(382)</b>	(93)
	-----	-----
<b>At 31 December</b>	<b>869</b>	1,251
	=====	=====

Loans to Key Management personnel are approved and disbursed as per the Bank's loan policy. The outstanding loans balance in respect of Key Management personnel as at 31 December 2025 was **SCR 0.87 million** (2024 – SCR 1.25 million).

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****45. COMMITMENTS**

Commitments not otherwise provided for in the financial statements and which existed at 31 December 2025 are as follows:

**45.1 Capital subscription in Afreximbank**

The Bank has a commitment to pay on call **USD 1.76 million** (2024 – USD 1.51 million) of nominal share value for capital subscription in Afreximbank. This amount has not been accounted for as a liability in the financial statements due to the unknown factor of the time and expected value of the shares to be called up. Furthermore, during the year, the Bank has applied part of its accumulated dividend earnings towards the acquisition of additional shares in Afreximbank.

**45.2 Advances to the Government**

The Bank is mandated under Sections 40(1) and 40A(1) of the CBS Act, 2004, as amended to grant temporary advances in SCR to the Government (see Note 4.18(b)). For the year 2025, **no advances** were made to the Government under Section 40(1) of the CBS Act, 2004, as amended (2024 – Nil) and Section 40A(1) of the CBS Act, 2004, as amended (2024 – Nil).

The overall borrowing limit for the year 2025 of **SCR 105.1 million** (2024 – SCR 1,297.0 million) comprised of the Board of Directors approved short-term advances to the Government for the year of **SCR 100.0 million** under Section 40(1) of the CBS Act, 2004, as amended (2024 – SCR 100.0 million under Section 40A(1)), and the outstanding sum of **SCR 5.1 million** (2024 – SCR 12 million) from the CBS buy-back operations. In accordance with Section 40(3) of the CBS Act, 2004, as amended, the SCR 1,185.1 million of investment securities that constituted the overall borrowing limit for 2024 has been excluded from the overall borrowing limit for 2025.

**45.3 Employee loans approved but not yet disbursed**

The Bank has a loans policy under which it disburses loans to its staff at a preferential rate. For the year 2025, staff loans approved but not yet disbursed amounted to **SCR 8.64 million** (2024 – SCR 3.16 million). Employees shall be eligible for loans under the loans policy if they have worked with the Bank for a continuous period of at least 2 years from the date of appointment. All loans are disbursed in full in one instalment except loans for the construction of personal residential housing which are disbursed in a minimum of three instalments and in the case of loans for further education whereby the amount of the loan shall be drawn in annual instalments.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****45. COMMITMENTS (CONTINUED)****45.4 *Emergency Lending Facility***

As part of its prudential toolkit, the Bank has an emergency liquidity support facility primarily aimed at preventing severe and persistent short-term liquidity problems and thus minimising bank runs. As at year end 2025, the total lending under this facility was **nil** (2024 – Nil). Access to this facility requires banks and SCU to provide adequate and sufficient collateral among other pre-requisites.

**45.5 *Major capital projects***

As at the reporting date, the Bank had contractual obligations for capital projects with amounts outstanding relating to the acquisition of Intangible Assets at **nil** (2024 – USD 0.04 million) and Property and Equipment at **EUR 3.63 million** and **SCR 0.01 million** (2024 – GBP 0.81 million and SCR 21.11 million). These capital projects are considered to be work-in-progress until the contracts are fulfilled.

**45.6 *Demolition of CBS Building***

The Bank intends to demolish its main building following the identification of structural damage during the year 2025. The demolition is expected to take place in 2027. As at the reporting date, no present obligation has been recognised in the statement of financial position as the related demolition costs could not be measured reliably for the year ended 31 December 2025. The Bank continues to monitor developments relating to the building and will recognise a provision when an obligation becomes present and the outflow of economic benefits is considered probable and can be reliably estimated.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****46. FINANCIAL RISK MANAGEMENT**

The Bank's risks are principally attributed to its functional obligations. The Bank is exposed to a variety of financial risks: market risk, credit risk and liquidity risk.

**46.1 Market risk**

Market risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks: interest rate risk, currency risk and other price risk.

The Bank's exposure to market risk comes in the form of general and specific market fluctuations which affect the investments in interest bearing and foreign currency denominated financial instruments. Further to that, the exposure to market risk is generated from both trading and asset/liability management activities. The measures taken by the Bank to manage such risk are disclosed below:

**(a) Interest rate risk**

Interest rate risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Interest rate risk is managed as follows:

- Foreign reserve interest rate risk management

Interest rate risk increases or reduces the total return on the portfolio which consists mainly of demand and short-term deposits and is measured by daily calculation of the weighted average portfolio duration of the foreign exchange reserves as prescribed in the Bank's Investment Policy and Guidelines. Limits are set on interest rate risk with the aim of avoiding reporting losses as a result of market valuation changes over one-year reporting period.

- Domestic market operations interest rate risk

The Bank's exposure to domestic market interest rate risk arises from its domestic market operations which are short-term in nature. These may include standing deposit and credit facilities, deposit and credit auctions, the buyback facility with other depository corporations and investment in Government treasury bills. The Bank cannot eliminate domestic market interest rate risk as it is a function of its monetary policy.

## (a) Interest rate risk (continued)

*Sensitivity to interest rate risk*

A sensitivity analysis is performed for each type of market risk to which the Bank is exposed at the end of the reporting period, showing how profit or loss and equity would have been affected by changes in the relevant risk variable that were reasonably possible at that date.

The table below presents the sensitivity analysis of the Bank's financial assets and liabilities in relation to changes in interest rates.

	<b>Total gain/(loss) impacting equity 2025 SCR' 000</b>	Total gain/(loss) impacting equity 2024 SCR' 000	<b>Total gain/(loss) impacting profit or loss 2025 SCR' 000</b>	Total gain/(loss) impacting profit or loss 2024 SCR' 000
<b>Impact of:</b>				
An increase of 100 basis points in the domestic market interest rates	<b>212</b>	284	<b>212</b>	284
A decrease of 100 basis points in the domestic market interest rates	<b>(212)</b>	(284)	<b>(212)</b>	(284)
An increase of 100 basis points in the market interest rates for foreign currencies	<b>6,793</b>	7,304	<b>6,793</b>	7,304
A decrease of 100 basis points in the market interest rates for foreign currencies	<b>(6,793)</b>	(7,304)	<b>(6,793)</b>	(7,304)

The Bank's exposure to interest rate risk might remain unchanged on both its local and foreign financial assets, despite the Guidelines for the latter allowing for a more active approach and the former being solely inclusive of Government treasury bills in the Bank's portfolio of securities.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***46. FINANCIAL RISK MANAGEMENT (CONTINUED)**46.1 ***Market risk (continued)***

## (b) Currency risk

Currency risk refers to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Bank through its reserve management function assumes currency risks, being changes in the prices of one currency against another. The currency composition of the reserves is strategically selected to mirror the country's foreign currency liabilities which forms a natural currency risk hedge. In addition to this strategic currency hedge, the Bank attempts to further mitigate exposures to short-term currency volatility through tactical management of the currency risk around the strategic currency composition. Exchange gains and losses arising from the revaluation of assets and liabilities denominated in foreign currencies are recognised in profit or loss and are transferred to the Revaluation Reserve Account in accordance with Section 16 of the CBS Act.

FOR THE YEAR ENDED 31 DECEMBER 2025****46. FINANCIAL RISK MANAGEMENT (CONTINUED)**46.1 **Market risk (continued)**

## (b) Currency risk (continued)

*Sensitivity to currency risk*

A sensitivity analysis is performed for each type of market risk to which the Bank is exposed at the end of the reporting period, showing how profit or loss and equity would have been affected by changes in the relevant risk variable that were reasonably possible at that date.

The table below presents the sensitivity analysis of the Bank's financial assets and liabilities in relation to changes in foreign exchange rates.

	Currency	(Increase)/Decrease in equity		(Increase)/Decrease in profit or loss	
		2025 SCR' 000	2024 SCR' 000	2025 SCR' 000	2024 SCR' 000
<b>Impact of:</b>					
An appreciation of 5.0% in the value of the Seychelles Rupee against all other currencies	<b>EUR</b>	<b>58,120</b>	59,792	<b>58,120</b>	59,792
	<b>USD</b>	<b>422,110</b>	346,853	<b>422,110</b>	346,853
	<b>GBP</b>	<b>7,812</b>	8,376	<b>7,812</b>	8,376
	<b>Others<sup>4</sup></b>	<b>18,277</b>	19,913	<b>18,277</b>	19,913
A depreciation of 5.0% in the value of the Seychelles Rupee against all other currencies	<b>EUR</b>	<b>(58,120)</b>	(59,792)	<b>(58,120)</b>	(59,792)
	<b>USD</b>	<b>(422,110)</b>	(346,853)	<b>(422,110)</b>	(346,853)
	<b>GBP</b>	<b>(7,812)</b>	(8,376)	<b>(7,812)</b>	(8,376)
	<b>Others</b>	<b>(18,277)</b>	(19,913)	<b>(18,277)</b>	(19,913)

Adherence to its Investment Policy and Guidelines implies that the Bank will continue to be exposed to foreign currency risk. Nonetheless, the Bank's foreign currency risk is limited by its investment in cash and cash equivalents, short-term investment and financial assets at FVTPL.

## (c) Other price risk

Other price risk refers to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market. Management is assisted by external fund managers in its strategy to maximise investment returns. All assets managed by fund managers and all buy and sell decisions are approved by same in compliance with the agreement which reflects compliance to the Investment Policy and Guidelines.

<sup>4</sup> The others category consists of XDR, AUD, CAD, ZAR, CNY and CNH

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****46. FINANCIAL RISK MANAGEMENT (CONTINUED)****46.1 Market risk (continued)****(c) Other price risks (continued)**

Other price risks stemming from the money market fund and foreign treasury securities portfolio are generally managed according to parameters stipulated within the Investment Policy and Guidelines. However, since the money market fund is not a standalone eligible asset class as stipulated in the Investment Policy and Guidelines, it was expressly authorised by the Board of Directors. Therefore, the management of associated risks is conducted with reference made to the underlying assets making up the fund. In addition, the nature of the fund requires that consideration is also given to tolerable risk thresholds related to external asset management.

*Sensitivity to price risk*

The table below presents the sensitivity analysis of the Bank's financial assets and liabilities in relation to changes in market price.

	Increase/(Decrease) in equity		Increase/(Decrease) in profit or loss	
	2025 SCR' 000	2024 SCR' 000	2025 SCR' 000	2024 SCR' 000
<b>Impact of:</b>				
An increase of 5% in the market price of foreign investments	<b>202,836</b>	194,042	<b>202,836</b>	194,042
A decrease of 5% in the market price of foreign investments	<b>(202,836)</b>	(194,042)	<b>(202,836)</b>	(194,042)

The Bank's foreign price risk is limited by its investment in financial assets classified as financial assets at FVTPL.

**46.2 Credit risk**

Credit risk refers to the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Credit risk also arises from loans and advances. Staff loans are managed by the Bank under the ambit of the staff loans policy which is approved by the Board of Directors. Depending on the staff loans category, appropriate security or collateral is taken in order to limit the impact of any potential default event. For staff still employed with the Bank, the risk of default is very unlikely in view that loan repayments are made from salary deductions and other dues to service the loans. The two relief credit line facilities, the PSRCLF and PSLERCLF are also subject to credit risk in view that the Bank provided loans to banks, DBS to further assist eligible micro, small, medium and large enterprises impacted by the COVID-19 pandemic.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****46. FINANCIAL RISK MANAGEMENT (CONTINUED)****46.2 Credit risk (continued)**

In the event of a default by the enterprises, the banks, DBS and SCU shall be liable to settle 30 per cent of the loans under PSRCLF and 50 per cent of the loans under PSLERCLF. The Government has provided a guarantee to cover 70 per cent of the loans for MSMEs under the PSRCLF and 50 per cent of the loans for the large enterprises under the PSLERCLF.

**(a) Credit risk measurement**

The Bank's maximum exposure is reflected in the carrying amount of financial assets in the statement of financial position.

The Bank's investments in short-term deposit instruments coupled with institutions of acceptable credit worthiness allows it to manage its credit risk effectively. As such, the Bank is not exposed to significant credit risk, which is the risk that its counterparts will be unable to fulfil their contractual obligations.

Credit risk related to the placement of deposits with international banks and other financial institutions, including correspondent banks, is guided by credit ratings obtained from Standard and Poor's, Moody's Investors Services, or Fitch Ratings. To be eligible for deposits, including holdings on correspondent account, the international bank must be rated investment grade or above.

To limit credit risk, no more than 35 per cent of reserves are invested in claims on international banks and other financial institutions with a minimum credit rating of 'A-'. Reflecting uncertainties regarding international banks and other financial institutions, the maturity of these deposits should not exceed 6 months. The exposure to credit risk in the local markets is limited due to the largest amount of domestic financial assets in the Bank's portfolio being Government securities which carry sovereign risk. Furthermore, given that the Bank is the regulatory authority for banks, any investment and transactions with them such as reverse repurchase agreements and foreign exchange swaps will be treated as low risk as such transactions are secured.

The following table presents the Bank's financial assets based on a composite of Standard and Poor's, Fitch and Moody's credit ratings. 'AAA' is the rating used for identification of highly reliable international financial institutions. This rating indicates that the entity has an extremely strong capacity to pay interest and principal. 'AA' is a high-grade rating and 'A' is an upper-medium grade rating, indicating a very strong capacity to pay interest and principal, respectively. 'BBB' is the lowest investment grade rating, indicating an adequate capacity to pay interest and principal. Ratings lower than 'AAA' can be modified by '+' or '-' signs to indicate relative standing within the major categories. 'N/R' indicates the entity has not been rated by any of the above-mentioned rating agencies.

## **CENTRAL BANK OF SEYCHELLES**

### **NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025**

#### **46. FINANCIAL RISK MANAGEMENT (CONTINUED)**

##### **46.2 Credit risk (continued)**

###### **(a) Credit risk measurement (continued)**

The estimation of credit exposure for risk management purposes requires the use of models, as the exposure varies with changes in market conditions, expected cash flows and the passage of time. The assessment of credit risk of a portfolio of assets entails further estimations as to the likelihood of defaults occurring, of the associated loss ratios and of default correlations between counterparties. The Bank measures credit risk using Probability of Default (“PD”), Exposure at Default (“EAD”) and Loss Given Default (“LGD”). The Bank uses PD obtained from the credit rating agency as a baseline and these are further recalibrated.

###### **Balances with other banks and financial institutions, including other central banks**

The Bank uses external credit risk ratings that reflect its assessment of the PD of individual and sovereign counterparties. The PDs are recalibrated to adjust the deviations in rankings.

###### **Staff loans**

After the date of initial recognition, for staff loans, the default event is determined as the staff leaving the Bank, having loans and not settled within 6 months as per stated policy.

###### **Expected credit loss measurement**

IFRS Accounting Standards 9 as issued by IASB outlines a 'three-stage' model for impairment based on changes in credit quality since initial recognition as summarised below:

- A financial instrument that is not credit-impaired on initial recognition is classified in 'Stage 1' and has its credit risk continuously monitored by the Bank.
- If a significant increase in credit risk (“SICR”) since initial recognition is identified, the financial instrument is moved to 'Stage 2' but is not yet deemed to be credit-impaired.
- If the financial instrument is credit-impaired, the financial instrument is then moved to 'Stage 3'.
- Financial instruments in Stage 1 have their ECL measured at an amount equal to the portion of lifetime expected credit losses that result from default events possible within the next 12 months. Instruments in Stages 2 or 3 have their ECL measured based on expected credit losses on a lifetime basis.
- A pervasive concept in measuring ECL in accordance with IFRS Accounting Standards 9 as issued by IASB is that it should consider forward looking information.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****46. FINANCIAL RISK MANAGEMENT (CONTINUED)****46.2 Credit risk (continued)****(a) Credit risk measurement (continued)**

Further explanation is also provided on how the Bank determines appropriate groupings when ECL is measured on a collective basis.

The key judgements and assumptions adopted by the Bank in addressing the requirements of the standard are discussed below:

**Significant increase in credit risk (SICR)**

The Bank considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following quantitative, qualitative or backstop criteria have been met:

*Quantitative criteria*

The remaining lifetime PD as at the reporting date has increased, compared to the residual lifetime PD expected as at the reporting date when the exposure was first recognised.

Balances with other banks and financial institutions, including other central banks: This is determined by a change/downgrade in external rating and depending on the original rating more than one may be needed to trigger a SICR transfer. Many of these exposures are short-term so it should be noted that the ratings changes required to trigger SICR would have to happen in a very short-timeframe.

Investment Securities will follow a similar approach to other counterparty exposures above. This is a longer-term exposure and the effect to moving to a lifetime ECL would be significant.

*Qualitative criteria*

The assessment of SICR incorporates forward-looking information in so far as the external ratings are constructed to reflect macro-economic outlook and impact.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****46. FINANCIAL RISK MANAGEMENT (CONTINUED)****46.2 Credit risk (continued)****(a) Credit risk measurement (continued)***Backstop*

A backstop is applied and the financial instrument considered to have experienced a significant increase in credit risk if the borrower is more than 90 days past due on its contractual payments.

The Bank has not used the low credit risk exemption for any financial instruments for the year ended 31 December 2025.

**Definition of default and credit-impaired assets**

The Bank defines a financial instrument as in default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

*Quantitative criteria*

The borrower has failed to meet contractual obligations on repayment being either 90 days in arrears or in the case of staff lending has left the Bank and failed to meet contractual requirement to settle the outstanding loan.

*Qualitative criteria*

The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:

- The borrower is in long-term forbearance
- The borrower is insolvent
- The borrower is in breach of financial covenant(s)
- An active market for that financial asset has disappeared because of financial difficulties
- Concessions have been made by the lender relating to the borrower's financial difficulty
- It is becoming probable that the borrower will enter bankruptcy

The criteria above have been applied to all financial instruments held by the Bank and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the PD, EAD and LGD throughout the Bank's expected loss calculations.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****46. FINANCIAL RISK MANAGEMENT (CONTINUED)****46.2 Credit risk (continued)****(a) Credit risk measurement (continued)**

An instrument is considered to no longer be in default (i.e., to have cured) when it no longer meets any of the default criteria for a consecutive period of six months.

**Measuring ECL — Explanation of inputs, assumptions and estimation techniques**

The ECL is measured on either a 12-month (12M) or Lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the PD, EAD and LGD, defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation (as per "Definition of default and credit-impaired" above), either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Bank expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). For example, for a revolving commitment, the Bank includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.
- LGD represents the Bank's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default (EAD). LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

The ECL is determined by projecting the PD, LGD and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e., the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the reporting date and summed. The discount rate used in the ECL calculation is the effective interest rate as at date or an approximation thereof.

## **CENTRAL BANK OF SEYCHELLES**

### **NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025**

#### **46. FINANCIAL RISK MANAGEMENT (CONTINUED)**

##### **46.2 Credit risk (continued)**

###### **(a) Credit risk measurement (continued)**

The Lifetime PD is developed by applying a maturity profile to the current 12M PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis.

The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by product type.

- For amortising products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over a 12-month or lifetime basis. This will also be adjusted for any expected overpayments made by a borrower. Early repayment/refinance assumptions are also incorporated into the calculation.
- For revolving products, the EAD is predicted by taking current drawn balance and adding a 'credit conversion factor' which allows for the expected drawdown of the remaining limit by the time of default. These assumptions vary by product type and current limit utilisation band, based on analysis of the Bank's recent default data.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. These vary by product type. LGDs are typically set at product level due to the limited differentiation in recoveries achieved across different borrowers. These LGDs are influenced by collection strategies, including contracted debt sales and price.

Forward-looking economic information is also included in determining the 12-month and lifetime PDs, EADs and LGDs. These assumptions vary by product type. Refer to the note overleaf for an explanation of forward-looking information and its inclusion in ECL calculations.

The assumptions underlying the ECL calculation, such as how the maturity profile of the PDs and how collateral values change are monitored and reviewed based upon new parameters being released by the rating agencies.

There have been no significant changes in estimation techniques or significant assumptions made during the reporting period.

#### **Forward-looking information incorporated in the ECL models**

The assessment of SICR and the calculation of ECL both incorporate forward-looking information on the corporate and sovereign exposures derived through the external rating and outlook.

## **CENTRAL BANK OF SEYCHELLES**

### **NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025**

#### **46. FINANCIAL RISK MANAGEMENT (CONTINUED)**

##### **46.2 Credit risk (continued)**

###### **(a) Credit risk measurement (continued)**

On staff lending, the data is very sparse and does not practically lend itself to macroeconomic modelling without undue cost and effort. A Pluto-Tasche adjustment is applied to the staff loan parameters to allow for volatility and prudence.

As with any economic forecasts, the projections and likelihoods of occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different to those projected. The Bank considers these forecasts to represent its best estimate of the possible outcomes and has analysed the non-linearities and asymmetries within the Bank's different portfolios to establish that the chosen scenarios are appropriately representative of the range of possible scenarios.

Management overlays can also be applied where justified, as approved by the Risk Management Committee ("RMC").

##### **Sensitivity analysis**

The most significant assumptions affecting the ECL allowance are as follows:

- The level of rating downgrade needed to trigger SICR on corporate and sovereign exposure and invoke a lifetime ECL calculation. Depending on the rating at origination, a downgrade of 1, 2 or 3+ notches is required to trigger a SICR and set using the ratings PD ranges.
- The adoption of an LGD of 53 per cent and 47 per cent on corporate and sovereign exposures respectively. Applying the LGD at the upper end of the range as a sensitivity has an ECL impact of **SCR 0.60 million** (2024 – SCR 0.66 million).
- The benchmarking and assumptions used in setting the ECL parameters for staff lending given the low loan volumes and very limited default history. This has been offset by invoking a Pluto-Tasche calculation to set some upper confidence limits. Additional information will need to be gathered and incorporated over time.

##### **Grouping of instruments for losses measured on a collective basis**

For expected credit loss provisions modelled on a collective basis, a grouping of exposures is performed on the basis of shared risk characteristics, such that risk exposures within a group are homogeneous.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****46. FINANCIAL RISK MANAGEMENT (CONTINUED)****46.2 Credit risk (continued)****(a) Credit risk measurement (continued)**

In performing this grouping, there must be sufficient information for the group to be statistically credible. Where sufficient information is not available internally, the Bank has considered benchmarking internal/external supplementary data to use for modelling purposes. The appropriateness of groupings is monitored and reviewed on a periodic basis by the Bank. The characteristics and any supplementary data used to determine groupings are outlined below:

*Loss allowance*

The loss allowance recognised in the period is impacted by a variety of factors, as described below:

- Transfers between Stage 1 and Stages 2 or 3 due to financial instruments experiencing significant increases (or decreases) of credit risk or becoming credit-impaired in the period, and the consequent "step up" (or "step down") between 12-month and Lifetime ECL;
- Additional allowances for new financial instruments recognised during the period, as well as releases for financial instruments de-recognised in the period;
- Impact on the measurement of ECL due to changes in PDs, EADs and LGDs in the period, arising from regular refreshing of inputs to models;
- Impacts on the measurement of ECL due to changes made to models and assumptions;
- Discount unwind within ECL due to the passage of time, as ECL is measured on a present value basis;
- Foreign exchange retranslations for assets denominated in foreign currencies and other movements; and
- Financial assets derecognised during the period and write-offs of allowances related to assets that were written off during the period.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****46. FINANCIAL RISK MANAGEMENT (CONTINUED)****46.2 Credit risk (continued)****(a) Credit risk measurement (continued)***Write-off*

The Bank writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include (a) ceasing enforcement activity and (b) where the Bank's recovery method is foreclosing on collateral and the value of the collateral is such that there is no reasonable expectation of recovering in full.

The Bank may write off financial assets that are still subject to enforcement activity. The outstanding contractual amounts of such assets written off for the year ended 31 December 2025 was nil (2024 – Nil). The Bank will seek to recover amounts it is legally owed in full, but which have been partially written off due to no reasonable expectation of full recovery.

Maximum exposure to credit risk — Financial instruments subject to impairment

The following table contains an analysis of the credit risk exposure of financial instruments for which an ECL allowance is recognised. The gross carrying amounts (including loans not yet disbursed) of financial assets below also represent the Bank's maximum exposure to credit risk on these assets.

	2025			Total	2024 Total

*Collateral and other credit enhancements*

The Bank has collateral for certain categories of staff loans in the form of guarantees, charges, property and pledge of insurance.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***46. FINANCIAL RISK MANAGEMENT (CONTINUED)****46.3 Liquidity risk**

Liquidity risk is the risk that the Bank will encounter difficulty in meeting obligations associated with its financial liabilities. It refers to the possible difficulties in selling (liquidating) large amounts of assets quickly, possibly in a situation where market conditions are also unfavourable, resulting in adverse price movement. As the Bank is the sole issuer of the national currency this channels its liquidity risk towards its foreign currency positions. On that basis, the liquidity of each financial instrument eligible for investment is duly considered by the Bank before an investment is made.

To reduce liquidity risk, the Bank can only invest in instruments with an active and liquid secondary market or instruments which can be prematurely traded or cancelled without incurring significant costs.

**(a) Contractual maturity of financial assets and liabilities**

The table overleaf analyses the Bank's financial assets and liabilities into relevant maturity groupings based on the remaining period as at the reporting date to the contractual maturity date. The amounts disclosed in the maturity table are the undiscounted cash flows which are adjusted for ECL. Such undiscounted cash flows differ from the amount included in the statement of financial position which is based on discounted cash flows. Balances due within one month equal their carrying balances, as the impact of discounting is not significant.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***47. FAIR VALUES OF FINANCIAL INSTRUMENTS**

The fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the Bank determines fair values using other valuation techniques.

For financial instruments that trade infrequently and have little price transparency, fair value is less objective and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

**47.1 Fair value of financial assets and liabilities**

The table below summarises the carrying amounts and fair values of investment securities which are not presented on the Bank's statement of financial position at fair value:

	2025		2024	
	Carrying value	Fair value	Carrying value	Fair value
	SCR' 000	SCR' 000	SCR' 000	SCR' 000
<b>Financial assets</b>				
Investment securities	<b>1,189,421</b>	<b>1,188,648</b>	1,191,053	1,192,548
	=====	=====	=====	=====

The fair value of investment securities classified at amortised cost is based on market prices of Government treasury bills as at the reporting date. The fair value of Government treasury bills has been computed using the compounded interest method at interest rates of **2.62 per cent** per annum for the 182-day treasury bills (2024 – 2.72 per cent per annum) and **2.69 per cent** per annum for the 365-day treasury bills (2024 – 2.80 per cent per annum). For all other financial assets and liabilities, their carrying amounts are a reasonable approximation of fair value.

## **CENTRAL BANK OF SEYCHELLES**

### **NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025**

#### **47. FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)**

##### **47.2 Valuation models**

The Bank measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1: inputs that are quoted market prices (unadjusted) in active markets for identical instruments.
- Level 2: inputs other than quoted prices included within level 1 that are observable either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.
- Level 3: inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which market observable prices exist, Black-Scholes and polynomial option pricing models and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

##### **47.3 Accounting classifications and fair values**

The following tables overleaf set out the fair values of financial instruments measured at fair value and analyse them by the level in the fair value hierarchy into which each fair value measurement is categorised. The tables also set out the other financial instruments not measured at fair value.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2025****47. FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)****47.3 Accounting classifications and fair values (continued)**

There have been no transfers during the year between levels 1 and 2. A reconciliation of fair value measurements in level 3 is set out below:

	<b>Equity Securities</b>	
	<b>2025</b>	2024
	<b>SCR' 000</b>	SCR' 000
Balance as at 1 January	<b>55,859</b>	47,163
Additions	<b>2,495</b>	2,265
Change in fair value	<b>3,185</b>	6,431
	-----	-----
<b>Balance as at 31 December</b>	<b>61,539</b>	55,859
	=====	=====

Reasonably possible changes to one of the significant unobservable inputs at reporting date would have no material effect on the fair value of the equity securities.

**47.4 Valuation techniques used**

The fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For the other financial instruments, the Bank determines fair values using the valuation technique set out in the table below:

<b>Description</b>	<b>Valuation technique</b>	<b>Sensitivity analysis</b>
Investments in shares with Afreximbank	Net asset value of the investee company	The estimated fair value would increase/decrease if the net asset value of the investee company increases/decreases
Loans and advances	Discounted cash flow model based on various assumptions, including expected future cash flows, market rates of interest. Present value is used	

**48. TAXATION**

The Bank is exempt from taxation under Section 49 of the CBS Act and particular revenue laws but is subject to payments of value added tax and withholds tax on services acquired from foreign entities.

**CENTRAL BANK OF SEYCHELLES****NOTES TO THE FINANCIAL STATEMENTS**  
*FOR THE YEAR ENDED 31 DECEMBER 2025***49. EVENTS AFTER REPORTING DATE*****Middle East conflict***

Subsequent to the reporting date, an armed conflict has ensued in the Middle East region. With intensification of the conflict, there is continued instability in the region leading to disruptions and negative impacts to economic markets, international travel, global shipping, supply chains, commodity prices and volatility in oil prices.

On the domestic front, disrupted flights through key Middle East hubs during Seychelles' peak tourist season, have reduced air connectivity and are likely to lower arrivals, earnings and foreign exchange inflows. Rising freight and insurance costs are expected to increase demand for foreign exchange. The exchange rate pass through impact will depend on the severity and magnitude of the disruptions. Combined with an anticipated weaker domestic currency, these factors are expected to contribute to inflationary pressures, mainly through the import channel. The overall extent of the economic impact of the conflict depends on how long the disruptions and safety concerns persist.

The Bank continues to monitor the situation as it remains dynamic. As at the finalisation date of these financial statements, a reasonable estimate of the potential impact could not be quantified.
